AGRICULTURAL AND APPLIED ECONOMICS

Bachelor of Science
The Agricultural and Applied Economics curriculum emphasizes a strong background in economics with applications to production agriculture, agribusiness, natural resources, and the environment. Courses are also included in basic agricultural and biological sciences, liberal arts, and business.

Employment opportunities for graduates in Agricultural and Applied Economics are many and diverse. Private sector opportunities include agricultural production, banking, finance, marketing, and public relations. Public sector opportunities include national/local organizations, government agencies, educational institutions, and cooperative extension services. Graduates have also begun businesses or returned to family-owned businesses. This major also provides an excellent background for professional or graduate study in several disciplines.

Students in the Agricultural and Applied Economics curriculum take a basic set of courses during the freshman and sophomore years. During the junior and senior years, students concentrate in one of five emphasis areas: Agricultural Business, Economics, International Trade and Development, Production, and Real Estate. Students should select an emphasis area by the end of the sophomore year.

Freshman Year
First Semester
3 - AP EC 205 Agriculture and Society
2 - C U 101 University Success Skills
3 - COMM 150 Intro to Human Communication
3 - MTHSC 102 Intro to Mathematical Analysis
4 - Natural Science Requirement
15

Second Semester
3 - AP EC 202 Agricultural Economics
3 - CP SC 120 Intro to Information Technology
3 - ENGL 103 Accelerated Composition
3 - EX ST 222 Statistics in Everyday Life
3 - PHIL 103 Introduction to Ethics
15

Sophomore Year
First Semester
3 - ACCT 201 Financial Accounting Concepts
3 - AP EC 328 Quantitative Applied Economics
3 - COMM 250 Public Speaking
3 - ECON 212 Principles of Macroeconomics
3 - Arts and Humanities (Literature) Requirement
15

Second Semester
3 - ACCT 202 Managerial Accounting Concepts
3 - AP EC 302 Economics of Farm Management
3 - EX ST 301 Introductory Statistics
3 - SOC 201 Introduction to Sociology
3 - Agriculture or Business Requirement
15

Junior Year
First Semester
3 - AP EC 309 Econ. of Agricultural Marketing
3 - ECON (MGT) 306 Managerial Economics or ECON 314 Intermediate Microeconomics
3 - ENGL 304 Business Writing or ENGL 314 Technical Writing
3 - MGT 201 Principles of Management
3 - MKT 301 Principles of Marketing
15

Second Semester
3 - AP EC 319 Agribusiness Management
3 - AP EC 421 Globalization or AP EC 460 Agricultural Finance
3 - C R D 335 Leadership in Org. and Comm.
3 - COMM 350 Small Group and Team Comm. or COMM 364 Organizational Comm.
3 - COMM 367 Negotiations Communication
3 - ECON 302 Money and Banking or ECON 315 Intermediate Macroeconomics
15

Senior Year
First Semester
3 - AP EC 402 Production Economics
3 - AP EC 452 Agricultural Policy
3 - CSENV (AP EC) 426 Cropping Syst. Analysis
3 - EX ST 462 Statistics Applied to Economics
3 - MGT 307 Personnel Management
15

Second Semester
3 - AP EC 456 Prices
3 - LA W 322 Legal Environment of Business
8 - Agriculture or Business Requirement
1 Elective
15

COMMUNITY AND ECONOMIC DEVELOPMENT CONCENTRATION
The program in Community and Economic Development provides career opportunities for social science administration, management, outreach, and research. A Bachelor of Science degree in Agricultural and Applied Economics with a concentration in Community and Economic Development facilitates employment with local, state, regional, federal, and international agencies; research and consulting firms; financial institutions; foundations and councils; public and private utilities; and organizations requiring entrepreneurial skills. This major provides an excellent background for professional and graduate study in several disciplines.

Associations between natural resources and social, economic, and political institutions are investigated. The Community and Economic Development program provides the conceptual, analytical, and pragmatic qualifications to succeed as economic development specialists. Students receive practical training, and internships are available to complement coursework.
## Freshman Year

**First Semester**
- CP SC 120 Intro. to Information Technology
- MTHSC 102 Intro. to Mathematical Analysis
- Arts and Humanities (Non-Lit.) Requirement
- Science and Tech. in Society Requirement
- Social Science Requirement

**Second Semester**
- ACCT 201 Financial Accounting Concepts
- ENGL 103 Accelerated Composition
- Natural Science Requirement
- Oral Communication Requirement
- Behavioral Science Requirement

## Sophomore Year

**First Semester**
- EX ST 301 Introductory Statistics
- Arts and Humanities (Literature) Requirement
- Microeconomics Requirement
- Oral Communication Requirement
- Behavioral Science Requirement

**Second Semester**
- C R D 357 Natural Resources Economics
- ECON 212 Principles of Macroeconomics
- PO SC 302 State and Local Government
- Advanced Writing Requirement
- Elective

## Junior Year

**First Semester**
- C R D 335 Leadership in Org. and Commun.
- ECON (MGT) 306 Managerial Economics
- ECON 314 Intermediate Microeconomics
- Behavioral Science Requirement
- Emphasis Area
- Marketing Requirement

**Second Semester**
- AP EC 352 Public Finance
- C R D 336 Community Development Methods
- Behavioral Science Requirement
- Emphasis Area
- Planning Requirement

## Senior Year

**First Semester**
- C R D (AP EC) 411 Regional Impact Analysis
- EX ST 462 Statistics Applied to Economics
- Behavioral Science Requirement
- Comm. and Econ. Dev. Practice/Applications
- Emphasis Area

**Second Semester**
- C R D (AP EC) 412 Regional Economic Development Theory and Policy
- Behavioral Science Requirement
- Comm. and Econ. Dev. Practice/Applications
- Emphasis Area

### AGRICULTURAL EDUCATION

#### Bachelor of Science

Agricultural Education provides broad preparation in agricultural sciences and professional education, including communications and human relations skills. In addition to required courses, students may select a minor. (See page 55.)

The Bachelor’s degree prepares students for professional education positions in the mainstream of agriculture including teaching, cooperative extension service, and government agricultural agencies. The Agricultural Education degree also prepares students for other educational work such as agricultural missionary, public relations, and training officers in agricultural industry.

#### Freshman Year

**First Semester**
- AG ED 102 Agric. Ed. Freshman Seminar
- AG ED 200 Agricultural Applications of Educational Technology

**Second Semester**
- AG ED 100 Orientation and Field Experience
- AG ED 103 Multiculturalism in Agric. Ed.

---

#### sophomore Year

**First Semester**
- AG ED 201 Intro. to Agricultural Education
- AG ED 204 Applied Agriculture Calculations

**Second Semester**
- AG ED 203 Teaching Agriscience
- AG M 205 Principles of Fabrication

---

#### Junior Year

**First Semester**
- ANTH 201 Introduction to Anthropology

**Second Semester**
- ED F 302 Educational Psychology
- HORT 303 Landscape Plants

---

#### Senior Year

**First Semester**
- AG ED 401 Instructional Methods in Ag. Ed.

**Second Semester**
- AG ED 406 Directed Teaching

124–125 Total Semester Hours

---

### AGRICULTURAL MECHANIZATION AND BUSINESS

#### Bachelor of Science

The Agricultural Mechanization and Business major provides a program for students who desire training in areas relevant to dynamic agricultural enterprise. The program is organized with strength in both business management and technical support of agriculture and agribusiness. To produce well-rounded individuals with good communication skills, the curriculum includes courses in the humanities, social sciences, English composition, and public speaking.

Graduates in Agricultural Mechanization and Business find meaningful and remunerative employment in a variety of situations directly and indirectly related to agricultural production, processing, marketing, and the many services connected therewith. Farming and technical sales in the agricultural, industrial, and heavy equipment industries are frequently chosen careers.

By completing this curriculum, graduates will have fulfilled the requirements for an Agricultural Business Management minor or other selected minor. Contact the Enrolled Student Services Office to have the minor recorded.
### Freshman Year

**First Semester**
- AG ED 200 Agricultural Applications of Educational Technology
- AG M 101 Intro. to Ag. Mech. and Business
- BIOL 103 General Biology I
- CH 105 Beginning Gen. and Organic Chem.
- MTHSC 102 Intro. to Mathematical Analysis

**Second Semester**
- PHYS 209 General Physics I Lab.
- ENGL 314 Technical Writing
- Agriculture Requirement
- AP EC 319 Agribusiness Management
- AG M 402 Drainage, Irrig. and Waste Mgt.

121 Total Semester Hours

1. See General Education Requirements.
2. Elective

### Sophomore Year

**First Semester**
- AG M 205 Principles of Fabrication
- AP EC 202 Agricultural Economics
- PHYS 200 Introductory Physics or PHYS 207 General Physics I and PHYS 209 General Physics I Lab.
- Arts and Humanities (Literature) Requirement
- COMM 250 Public Speaking
- E G 209 Intro. to Engr./Comp. Graphics
- Minor Requirement

17

**Second Semester**
- ACCT 201 Financial Accounting Concepts
- AG M 206 Machinery Management
- AG M 303 Calculations for Mechanized Agric.
- ENGL 304 Business Writing or ENGL 314 Technical Writing
- Minor Requirement

Second

**Junior Year**

**First Semester**
- AG M 221 Surveying
- AG M 301 Soil and Water Conservation
- AG M 460 Electrical Systems
- AP EC 302 Economics of Farm Management
- ENGL 304 Business Writing or ENGL 314 Technical Writing
- Minor Requirement

16

**Second Semester**
- AG M 406 Mechanical and Hydraulic Systems
- AP EC 309 Econ. of Agricultural Marketing
- CSENV 202 Soils
- Arts and Humanities (Non-Lit.) Requirement
- Minor Requirement

16

**Senior Year**

**First Semester**
- AG M 402 Drainage, Irrig. and Waste Mgt.
- AP EC 319 Agribusiness Management
- Agriculture Requirement
- Social Science Requirement

12

### Second Semester

- AG M 405 Agricultural Structures and Environmental Control
- AG M 410 Precision Agriculture Technology
- AG M 452 Mobile Power
- AG M 472 Capstone
- Minor Requirement

Second

See General Education Requirements.

### Animal and Veterinary Sciences

#### Bachelor of Science

The curriculum in Animal and Veterinary Sciences provides students with a broad base of understanding of scientific principles and the application of these principles to scientific, technical, and business phases of livestock and poultry production, processing, and marketing. Special emphasis is placed on hands-on instruction, and students are given many opportunities to work with animals at the Morgan Poultry Farm, LaMaster Dairy Center, Starkey Swine Center, Equine Center, and Simpson Beef Unit.

Students choosing the Animal Agribusiness Concentration will prepare for careers as trainers, managers, riding instructors, sales representatives, etc. Students selecting the Preveterinary and Science Concentration will meet the requirements for most veterinary schools, graduate schools, and medical and dental schools. Students with South Carolina residency may compete for slots at the Mississippi State, Tuskegee, and University of Georgia Colleges of Veterinary Medicine.

### Animal Agribusiness Concentration

#### Freshman Year

**First Semester**
- AVS 100 Orientation to AVS
- AVS 150 Introduction to Animal Science
- AVS 151 Intro. to Animal Science Lab.
- BIOL 103 General Biology I
- CH 101 General Chemistry
- Arts and Humanities (Non-Lit.) Requirement

Second

16-17

### Second Semester

- BIOL 104 General Biology II
- CH 102 General Chemistry
- ENGL 103 Accelerated Composition
- MTHSC 102 Intro. to Math. Analysis
- MTHSC 106 Calculus of One Variable I

18

### Sophomore Year

**First Semester**
- ACCT 201 Financial Accounting Concepts
- AP EC 202 Agricultural Economics
- AVS 312 Forages and Grazing Systems
- Arts and Humanities (Literature) Requirement
- AVS Techniques Requirement

14

**Second Semester**
- AVS 310 Animal Health
- AVS Evaluation Requirement
- AVS Techniques Requirement
- Departmental Requirement
- Social Science Requirement
- Elective

16

### Junior Year

**First Semester**
- AVS 301 Anat. and Phys. of Domestic Animals
- AVS 370 Principles of Animal Nutrition
- AVS 470 Animal Genetics
- Advanced Writing Requirement
- Departmental Requirement

16

**Second Semester**
- AVS 375 Applied Animal Nutrition
- AVS 413 Animal Products
- AVS 453 Animal Reproduction
- AVS Techniques Requirement
- Departmental Requirement
- Science and Tech. in Society Requirement

17

### Senior Year

**First Semester**
- AVS 360 Advanced Internship

Second

12-126 Total Semester Hours

BIOCHEMISTRY

Bachelor of Science

Biochemistry is the study of the molecular basis of life. To comprehend current biochemical information and make future contributions to our molecular understanding of life processes, students must obtain a broad background in biology and a firm foundation in chemistry, mathematics, and physics. This is the basis of the biochemistry curriculum.

The program provides an excellent educational background for professional school (medicine, dentistry, or veterinary medicine) and graduate school in biochemistry, molecular biology, or another biological science discipline. Graduates will find employment opportunities in the research and service programs of universities, medical schools, hospitals, research institutes, and industrial and government laboratories.
Freshman Year
First Semester
1 - BIOC 103 Careers in Biochem. and Genetics
5 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
4 - MTHSC 106 Calculus of One Variable I

120–121 Total Semester Hours
¹CH 225 may substitute for CH 227, and CH 226 may substitute for CH 228. In both cases, the additional hour of credit counts toward a science requirement.
²See General Education Requirements.
³CH 331 may be substituted.
⁴Select from CH 411, ENT (GEN) 495, GEN (BIOCSC, GEN) 405, 410, (BIOCSC) 416, (BIOCSC, MICRO) 418, 420, 450, HORT (BIOCSC, GEN) 465, MICRO 415. Other courses must be approved by advisor.
⁵To be taken over two semesters with the same faculty member
⁶A two-semester sequence of a foreign language is strongly recommended.
²See General Education Requirements. This course must also satisfy the Cross-Cultural Awareness Requirement.

BIOLoGICAL SCIENCES
Bachelor of Science
Biology encompasses the broad spectrum of the modern life sciences, including the study of all aspects of life from the structure and function of the whole organism down to the subcellular levels and up through the interactions of organisms to the integrated existence of life on the entire planet. Descriptive, structural, functional, and evolutionary questions are explored through the hierarchy of the organization of life. Applications of current advances to the health and well-being of man and society, to nature and the continuation of earth as a balanced ecosystem, and to an appreciation of the place of natural science in our cultural heritage receive emphasis.

Majors in Biological Sciences receive classroom, laboratory, and field training in biology with an emphasis on chemistry, mathematics, and physics as necessary tools. The Bachelor of Science in Biological Sciences curriculum prepares students for graduate study in any of the life science areas (such as agricultural sciences, biochemistry, botany, cell and molecular biology, conservation, ecology and environmental science, entomology, forestry, genetics, industrial and regulatory biology, microbiology, morphology, physiology, wildlife biology, and zoology; for the health professions (medicine, dentistry, etc.); veterinary medicine; and for science teaching.

Combined Bachelor of Science in Biological Sciences/Master of Science in Bioengineering
Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. See Academic Regulations in this catalog for enrollment guidelines and procedures.

Students are encouraged to obtain the specific requirements for the dual degree from the Department of Biological Sciences or Bioengineering as early as possible in their undergraduate program as a number of required courses have prerequisites not normally taken by Biological Sciences majors.

**College of Agriculture, Forestry, and Life Sciences**

1BIOL 110 and 111 are strongly recommended; however, BIOL 103 may substitute for BIOL 110, and BIOL 104 may substitute for BIOL 111. The remaining 1–2 credits required must be satisfied by completing 1–2 extra credits from departmental course offerings at the 300 level or above. See advisor.

2At least one lecture and associated laboratory must be completed for both Animal Diversity (BIOSC 302/306 or BIOSC 303/307) and for Plant Diversity (BIOSC 304/308 or BIOSC 305/309).

3See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

4At least one lecture and associated laboratory must be completed for both Biochemistry (BIOCH 301/302 or 305/306) and for Genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.

5See advisor. Select one lecture/lab combination from each of the following fields:

**Ecology**—BIOSC 443/441, 444/445, 446/447, 470/471

**Physiology**—BIOSC 401/402, 459/460, 475/476

The remaining courses may be selected from BIOCH 302, BIOCH 303, MICRO 305, or any BIOSC, BOT, or ZOOL courses at the 300 level or higher.

6See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

7At least one lecture and associated laboratory must be completed for both Biochemistry (BIOCH 301/302 or 305/306) and for Genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.

8See advisor. Select one lecture/lab combination from each of the following fields: BIOCH 475 and 476 are recommended to satisfy the Physiology Requirement.

9At least one lecture and associated laboratory must be completed for both Biochemistry (BIOCH 301/302 or 305/306) and for Genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.

10See advisor. Select one lecture/lab combination from each of the following fields: CH 459/460 and 475/476 are recommended to satisfy the Toxicology Requirement.

11CH 223/227 and 224 are recommended.

12At least one lecture and associated laboratory must be completed for both Animal Diversity (BIOSC 302/306 or BIOSC 303/307) and for Plant Diversity (BIOSC 304/308 or BIOSC 305/309).

13At least one lecture and associated laboratory must be completed for both Biochemistry (BIOCH 301/302 or 305/306) and for Genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.

14See advisor. Select one lecture/lab combination from each of the following fields: BIOCH 459/460 and 475/476 are recommended to satisfy the Physiology Requirement.

15CH 223/227 and 224 are recommended.

16At least one lecture and associated laboratory must be completed for both Animal Diversity (BIOSC 302/306 or BIOSC 303/307) and for Plant Diversity (BIOSC 304/308 or BIOSC 305/309).

17At least one lecture and associated laboratory must be completed for both Biochemistry (BIOCH 301/302 or 305/306) and for Genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.

18See advisor. Select one lecture/lab combination from each of the following fields: BIOCH 459/460 and 475/476 are recommended to satisfy the Physiology Requirement.

19CH 223/227 and 224 are recommended.
**BIOLOGICAL SCIENCES**

**Bachelor of Arts**

The Bachelor of Arts in Biological Sciences provides a strong foundation in biology and is ideal for students desiring a liberal education emphasizing an interdisciplinary approach to a thorough understanding of the life sciences.

125–126 Total Semester Hours

1 *BIOL 110 and 111 are strongly recommended; however, BIOL 105 may substitute for BIOL 110, and BIOL 104 may substitute for BIOL 111. The remaining 1–2 credits required must be satisfied by completing 1–2 extra credits from departmental course offerings at the 300 level or above. See advisor.

2 *CH 223, 227, and 224 may be substituted for CH 201. Most professional health sciences schools require two semesters of organic chemistry with laboratory.

3 *At least one lecture and associated laboratory must be completed for both Animal Diversity (BIOSC 302/306 or BIOSC 303/307) and for Plant Diversity (BIOSC 304/308 or BIOSC 305/309).

4 *At least one lecture and associated laboratory must be completed for both Biochemistry (BIOCH 301/302 or 305/306) and for Genetics (GEN 303/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.

5 *Four semesters (through 201) in the same modern foreign language are required.

6 *See page 55 for approved minors.

7 *See advisor. Select one lecture course from each of the following fields:

    Ecology—BIOSC 441, 442, 444, 470
    Physiology—BIOSC 401, 459, 475

   The remaining courses must be selected from MICRO 305 or other BIOSC, BOT, or ZOOL courses at the 100 level or higher.

8 *See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

**BIOSYSTEMS ENGINEERING**

**Bachelor of Science**

The Biosystems Engineering program is administered jointly with the College of Engineering and Science. See page 82 for the curriculum.

**ENVIROMENTAL AND NATURAL RESOURCES**

**Bachelor of Science**

The Environmental and Natural Resources curriculum produces professionals who have a broad-based knowledge in natural resources and an ability to interact with other resource professionals and to provide thoughtful solutions to environmental and natural resource problems. The world is blessed with an abundance of natural resources, but the problems associated with their conservation are immense. Protection of rare and endangered species, preventing and controlling invasions of exotic species, protecting old growth forests, restoring degraded ecosystems, and balancing the resource demands of industry and the public are some of the environmental issues which are enmeshed in politicized environments.

Three concentrations are offered within the Environmental and Natural Resources major. The Conservation Biology Concentration is oriented toward students who desire a greater exposure to taxa, their habitats and their interrelationships. The Natural Resource and Economic Policy Concentration provides more in-depth study in economics and policy applications. The Natural Resources Management Concentration emphasizes both resource management and negotiation skills.

Graduates in Environmental and Natural Resources are well-prepared for further graduate studies in natural resources and related fields. Potential public sector employers of graduates include federal, state, and municipal resource management agencies, private industries impacting land and water resources, environmental management consulting firms, and various environmental advocacy groups.

121 Total Semester Hours

See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
A minor is required and must be selected from the following: Biochemistry, Biological Sciences, Chemistry, Community Recreation Management, Crop and Soil Environmental Science, Environmental Science and Policy, Forest Resource Management, Geology, Horticulture, Legal Studies, Microbiology, Natural Resource Economics, Nonprofit Leadership, Park and Protected Area Management, Sport Management, Therapeutic Recreation, Travel and Tourism, Urban Forestry, Wildlife and Fisheries Biology.

See advisor.
FOOD SCIENCE

Bachelor of Science

Food Science majors apply principles of basic and applied sciences to the design, creation, manufacture, packaging, distribution, and utilization of safe, nutritious, and enjoyable foods and food products. The curriculum allows flexibility for concentrating in one of two areas.

In the Food Science and Technology Concentration, students may emphasize business, culinary science, (one of three national programs that have been approved by the Research Chef’s Association as Culinology™), engineering, food packaging, and additional sciences that complement requirements of the Institute of Food Technologists.

The Nutrition and Dietetics Concentration emphasizes nutrition and related areas. It is currently granted approval status by the Commission on Accreditation for Dietetics Education of the American Dietetic Association.

Food processing industries, ingredient manufacturers, and packaging suppliers employ graduates in new food product development, quality assurance, production management, and technical sales. State and federal agencies also need graduates for food safety and regulatory positions. With the Nutrition and Dietetics Concentration, employment opportunities include dietitians, nutritionists, consultants, and food specialists. Placement rates are high for these fields, and graduates are also well prepared to pursue graduate study in many areas.

The Department of Food Science and Human Nutrition also offers an accelerated five-year combined bachelor/master’s program that allows students to count up to twelve hours of graduate credit to toward both the BS degree in Food Science and MS degree in Food, Nutrition, and Culinary Sciences. Details are available from the Department of Food Science and Human Nutrition or at www.clemson.edu/foodscience.

Freshman Year

First Semester
4 - BIOL 103 General Biology I or
5 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
3 - COMM 150 Intro. to Human Communication
1 - FD SC 101 Epochs in Man's Struggle for Food
3 - MTHSC 102 Intro. to Math. Analysis or
4 - MTHSC 106 Calculus of One Variable I
15-17

Second Semester
4 - BIOL 104 General Biology II or
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
2 - FD SC 102 Perspectives in Food and Nutrition Sciences

FOREST RESOURCE MANAGEMENT

Bachelor of Science

The Forest Resource Management curriculum combines a broad education in the arts and sciences with applied forest sciences. This combination provides the necessary foundation for the scientific management of forest resources, products, and services. Foresters are qualified for a broad spectrum of employment opportunities in the public and private sectors. They may be engaged as managers, administrators, or owners of forest lands or forest-based businesses; as technical specialists in the production of timber, useable water, wildlife, and aesthetic values, and in the recreational use of the forest; or as professionals in other areas where the conservation of natural resources is a concern. Foresters earning advanced degrees find employ-
ment in academic work and in research conducted by public and private agencies.

The curriculum, accredited by the Society of American Foresters, provides a strong program in the basic knowledge and skills required of a professional forester. Forest Resource Management majors will select a minor. (See page 55.) The curriculum also provides the necessary prerequisites for graduate study.

Freshman Year
First Semester
1 - F N R 499 Natural Resources Seminar
2 - FOR 314 Harvesting and Forest Products
3 - FOR (E N R) 416 Forest Policy and Admin.
4 - FOR 417 Forest Resource Mgt. and Regulation
3 - Minor Requirement
15

Second Semester
1 - GEN 103 Careers in Biochem. and Genetics
2 - BIOCH 301 Molecular Biochemistry
3 - GEN 410 Fundamentals of Genetics I
1 - CH 224 Organic Chemistry
2 - PHYS 122 Physics with Calculus I
1 - PHYS 124 Physics Lab. 1
14

Sophomore Year
First Semester
3 - CH 228 Organic Chemistry
1 - CH 227 Organic Chemistry Lab.

To be selected by the middle of the sophomore year

GENETICS
Bachelor of Science
Genetics is the study of heredity. Genetics research takes many forms, from the study of heredity at the level of individual molecules to study at the level of cells and chromosomes, individuals, or populations. To comprehend current genetic information and to make future contributions to our molecular understanding of life processes, students must obtain a broad background in biology and a firm foundation in chemistry and mathematics. This is the basis of the genetics curriculum.

A degree in Genetics is a strong preparation for many careers. The degree provides an excellent foundation for medical, veterinary, or pharmacy school as well as graduate research in any discipline related to biology, including bioinformatics, forensic technology, and genetic counseling. Because of the increasing emphasis on genetics in everyday life, a Bachelor of Science in Genetics can also be a direct path to a career in the emerging biotechnology industries (pharmaceuticals, agricultural technologies, biomimetic minerals) either in research, sales, or business operations. Combined with a law degree, a genetics bachelor of science is a good background for a career as a patent attorney.

1Medical, veterinary, and graduate school requirements often include two semesters of physics with calculus and the physics laboratory. Students are encouraged to check requirements for admission to professional postgraduate programs.

2See General Education Requirements.
Horticulture
Bachelor of Science

Horticulture is the art, science, and business of food crops, ornamental plants, and turfgrasses and their production, utilization, and maintenance. A strong foundation in the basic sciences and humanities is built on courses in mathematics, chemistry, botany, physics, computer science, communications, economics, and humanities. Horticulture as a science depends on disciplines such as plant pathology, plant physiology, entomology, forestry, agronomy, soils, agricultural engineering, and agricultural economics. Business courses contribute to a well-rounded curriculum. A growing aspect of horticulture involves the management of enterprises, from production to distribution and marketing. Horticulture as an art involves the arrangement of plants in an aesthetically pleasing fashion.

Students begin professional development as undergraduates. An internship in a horticultural enterprise is required. Students considering graduate school are advised to take optional courses in the basic sciences as well as conduct an undergraduate research project. Those with strong interests in specific disciplines may complete special problems under the supervision of a faculty member.

Microbiology
Bachelor of Science

Microbiology deals with the study of bacteria, viruses, yeasts, filamentous fungi, protozoa, and unicellular algae. Microbiologists seek to describe these organisms in terms of their structures, functions, and processes of reproduction, growth, and death at both the cellular and molecular levels. They are also concerned with their ecology, particularly in regard to their pathological effects on man, and with their economic importance.

The Microbiology major provides a thorough training in the basic microbiological skills. Further, students receive instruction in mathematics, physics, chemistry, and biochemistry, all essential to the training of a modern microbiologist. Students can prepare for a variety of careers through a wide choice of electives. The Microbiology curriculum with a Biomedicine Concentration is recommended for students planning postgraduate programs. Microbiology graduates may enter graduate school in microbiology, biochemistry, bioengineering, or related disciplines; they may enter medical or dental schools or pursue careers in one of the many industries or public service departments dependent upon microbiology. Some of these are the fermentation and drug industries, medical and public health microbiology, various food industries, and agriculture.

Microbiology majors planning to apply for admission to a medical or dental school should inform their advisors immediately upon entering the program.

PACKAGING SCIENCE

Bachelor of Science
The Bachelor of Science degree in Packaging Science prepares students for careers in industries producing and utilizing packages for all types of products. Packaging is an essential part of industrialized economies, protecting, preserving, and helping to market products. The field of packaging is highly competitive and highly innovative, requiring an ever-increasing number of professional positions.

Opportunities for employment include a wide variety of career paths such as manufacturing, marketing, sales, design, purchasing, quality assurance, and customer services. Most career opportunities are in positions requiring technical knowledge combined with marketing and management skills.

The core curriculum assures graduates of having the skills and knowledge required by most entry-level packaging positions. Emphasis area choices or approved minors allow students to select courses to improve career preparation for specific industry segments, including distribution and transportation, engineering technology, food and health care packaging, graphic communications, materials, business administration, entrepreneurship, environmental engineering, environmental science and policy, and management.

Students changing majors to Packaging Science must have at least a 2.0 cumulative grade-point ratio.

Freshman Year
First Semester

123 Total Semester Hours

1 A C or better is required in this course for graduation.
2 See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Require-
3 ment. Note: Social Science Requirement must be in an area other than economics. A 200-level or higher foreign language course is recommended to satisfy the Arts and Humanities (Non-Literature) Requirement.
4 Students interested in minors or emphasis areas should take any prerequisites in the sophomore year.
5 See advisor.
6 At least one 15-week period (six months preferred) of Cooperative Education is required.
7 Completion of an approved minor or emphasis area is required. Approved minors are Business Administration, Entrepreneurship, Environmental Engineering, Environmental Science and Policy, Management.
8 Emphasis Areas consist of 15 credit hours selected from one of the following areas:
9 Distribution and Transportation—C E 255, 311, 410, 411, (C R P 412, MGT 305, 317, 423, 424, 426
10 Engineering Technology—AG M 205, 406, 460, C E 253, E G 209, ENGR 120, 130, THRD 181, 220, 224, 250, 420
11 Food and Health Care Packaging—BIOE 302, 320, 401, FD SC 214, 401, 402, 404, M I C R O 305, 407
12 Graphic Communications—G C 207, 215, 245, 310, 405, 406, 407, 440, 446.
13 Materials—BIO E 302, C M E 210, 241, 319, FOR 441, PKGSC 471, TEXT 176
14 PKGSC 404 and 454 must be taken concurrently.

PREPROFESSIONAL HEALTH STUDIES

Non-degree
The health professions need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. The philosophies of education, the specific preprofessional course requirements, the noncognitive qualifications for enrollment, and the systems of training vary among the professional health schools; but all recognize the desirability of a broad education—a good foundation in the natural sciences, highly developed communication skills, and a solid background in the humanities and social sciences. The absolute requirements for admission to professional health schools are limited to allow latitude for developing individualized undergraduate programs of study; however, most schools of medicine and dentistry require 16 semester hours of chemistry, including organic chemistry, eight hours of biological sciences, eight hours of physics, and at least one course in calculus. These requirements should be balanced with courses in vocabulary building, the humanities, and social sciences. The basic requirements in the natural sciences and as many of the courses in the humanities and social sciences as possible should be completed by the third year so that students will be prepared to take the Dental Admission Test or the Medical College Admission Test prior to applying to a professional school.

Undergraduates may also prepare to study optometry, podiatry, and other health professions. While the basic requirements for these professional schools are essentially the same as those for schools of medicine and dentistry, specific requirements for individual schools in these professions vary somewhat; consequently, interested students are advised to consult with the chief health professionals advisor.

At Clemson, rather than having a separate, organized preprofessional health study program, students are allowed to major in any curriculum, as long as the basic entrance requirements of the professional health school are fulfilled. These schools are not as concerned about a student’s major as they are about academic performance whichever curriculum the student chooses. Professional health schools have neither preferences nor prejudices concerning any curriculum, which is evidenced by the fact that their entering students represent a broad spectrum of curricula. The emphasis is placed on the student’s doing well in the curriculum chosen, and this becomes critical as competition increases for the limited number of places available in professional health schools.

PREPHARMACY
The two-year Prepharmacy program requires of 66–72 credit hours depending on the pharmacy school of interest. Upon completion of the program, students will be eligible to apply to a college of pharmacy, usually the South Carolina College of Pharmacy (MUSC and USC campuses), and may be eligible to apply for the Bachelor of Science in Preprofessional Studies. The degree in Pharmacy is awarded by the institution attended. It is important for students to work closely with their advisor as there are variations in courses required by the pharmacy schools.

For financial aid purposes, students in the Prepharmacy program are considered to be enrolled in a degree-seeking program.

First Year
First Semester
1. BIOL 103 General Biology I

Third Year

72–90 Total Semester Hours

* A H 210, MUSIC 210, or THEA 317
* The Department of Physical Therapy requires MICRO 222 and 223. To be eligible for both professional schools, the course(s) not taken this semester must be taken during a summer term or third year of study.

Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.

See advisor.

See General Education Requirements.

Students planning to receive the Bachelor of Science degree upon completion of the program are required to complete an additional 18 credit hours. See advisor for requirements.

Note: The University of South Carolina requires credit for two semesters of a foreign language or exemption by examination.

PREREHABILITATION SCIENCES

The Prerehabilitation Sciences major includes concentrations in physical therapy, occupational therapy, communication sciences and disorders, as well as in physician assisting, and allied health areas. This curriculum is designed to meet the requirements of the programs in the College of Health Professions at the Medical University of South Carolina and other professional schools. The program requires a minimum of 90 semester hours of undergraduate coursework. In addition, students must apply to a professional school for acceptance into its program.

Because preparation for some of the concentrations, such as the physical therapy, occupational therapy, and communication sciences and disorders programs at MUSC, requires a baccalaureate degree in any area, students are advised to select a major with similar requirements after consultation with the Prerehabilitation Sciences advisor. The following curriculum fulfills the general requirements for those fields, requiring less than a baccalaureate degree. Electives should be chosen after consultation with the advisor. Professional schools may change their requirements at any time, so it is imperative that students in this major stay in close contact with their advisor.

For financial aid purposes, students in the Prerehabilitation Sciences program are considered to be enrolled in a degree-seeking program.

Second Year

Students planning to receive the Bachelor of Science degree upon completion of the program are required to complete an additional 24 credit hours. See advisor for requirements.

PREVETERINARY MEDICINE

Under a regional plan, the South Carolina Prevet-
ernary Advisory Committee coordinates a program for South Carolina residents who are interested in pursuing careers in veterinary medicine. South Carolina residents attending any college or university may apply through the Veterinary Medical College Application Service (VMCAS) to the University of Georgia College of Veterinary Medicine. Currently the University of Georgia admits up to 17 students each year through arrangements with the Southern Regional Education Board. The State of South Carolina has a contract with Mississippi State University to admit up to five South Carolina residents. The State of South Carolina also has a contract with Tuskegee University to admit up to four South Carolina residents. Application must be made directly to Tuskegee University.

Minimum requirements for admission to a college of veterinary medicine generally include the satisfactory completion of prescribed courses in a well-rounded undergraduate degree program. Specific requirements for admission to the University of Georgia College of Veterinary Medicine include the following undergraduate courses: six credits of English, 14 credits of humanities and social studies, eight of physics, eight of general biology, eight credits of advanced biology, three credits of biochemistry, and 16 credits of organic and inorganic chemistry. (Chemistry and physics courses must be at the premedical level; they may not be survey courses.)

TURFGRASS

Bachelor of Science

The Turfgrass program is designed for students interested in careers in the rapidly growing turfgrass industry, with courses in turfgrass management, pathology, agricultural mechanization, personnel management, soil fertility, soil microbiology, weed control, and park and recreation management. Graduates pursue careers in professional lawn care; maintenance of parks, athletic fields, and golf courses; production and sale of seed, sod, supplies, and equipment; or as technicians for businesses or government agencies.

Freshman Year

First Semester
4 - BIOL 103 General Biology I
3 - CH 101 General Chemistry
3 - PSYCH 201 Introduction to Psychology
3 - Arts and Humanities (Non-Lit.) Requirement
3 - Mathematics Requirement

Second Semester
4 - BIOL 104 General Biology II
3 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
3 - EX ST 301 Introductory Statistics
3 - SOC 201 Introduction to Sociology
1 - Elective

To be in the best competitive position, applicants should complete courses in animal agriculture, genetics, nutrition, biochemistry, and advanced biology. Considerations for selection are character, scholastic achievement, personality, experience with large and small animals, general knowledge, and motivation. In the past, competition has been keen, and only those applicants who have shown exceptional ability have been admitted. Specific considerations may include a minimal grade-point average and completion of standardized tests such as the Graduate Record Examination and the Veterinary College Admission Test.

Since out-of-state students attending Clemson are ineligible to apply to the University of Georgia or Tuskegee University under the South Carolina quota, they should contact the college(s) of veterinary medicine to which they plan to apply. They may apply at the University of Georgia for at-large admission.

Veterinary schools accept students with a broad range of academic backgrounds; therefore, it is recommended that the beginning university student select any undergraduate major and simultaneously complete the courses required for veterinary school entrance and those required for completion of a BS or BA degree. For students selecting Animal and Veterinary Sciences or Biological Sciences at Clemson University, the basic curricula have been designed to accommodate Georgia’s entrance requirements. Further information is available from the Department of Animal and Veterinary Sciences at 864-656-3427.

Turfgrass Program Requirements

Students interested in the Turfgrass program must complete the following courses and register with the College of Agriculture, Forestry, and Life Sciences at Clemson University, the Department of Animal and Veterinary Sciences or Biological Sciences.
Sophomore Year

121 Total Semester Hours

1See advisor. Select from department-approved list.
2Internship must be completed in one or two semesters. Internship may be done fall, spring, or summer after completing HORT 212/213. Prior approval is required for internships, and a 2.0 grade-point ratio is required for registration.
3Note: Turfgrass majors must make a C or better in all HORT-designated courses. Courses may be repeated as often as necessary to achieve the minimum grade.

WILDLIFE AND FISHERIES BIOLOGY

Bachelor of Science
Increased interest in conservation of natural resources and the environment and demand for seafood products have resulted in these areas becoming increasingly technical and requiring highly qualified wildlife and fisheries biologists. Greatest demands for graduates are in the areas of management, research, survey, and regulatory positions with state and federal agencies; industrial research and quality control laboratories; conservation, recreational, and other public service agencies; and private enterprises.

The Bachelor of Science degree program in Wildlife and Fisheries Biology provides a solid foundation for many careers in the sciences. The curriculum is strong in basic and applied sciences, communication skills, and the social sciences. In addition, three credit hours are available for field training with appropriate natural resource agencies. Students may satisfy coursework requirements for professional certification by the Wildlife Society and/or the American Fisheries Society.

Combined Bachelor of Science/
Master of Science Degree Program
Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Forestry and Natural Resources as early as possible in their undergraduate program as a number of required courses have prerequisites not normally taken by Wildlife and Fisheries Biology majors. Enrollment guidelines and procedures can be found under Academic Regulations in this catalog.

Freshman Year

First Semester
4 - BIOL 103 General Biology I
4 - CH 105 Beginning Gen. and Organic Chem.1
1 - EN R 101 Intro. to Env. and Natural Res.
3 - MTHSC 102 Intro. to Mathematical Analysis
3 - Elective

Second Semester
4 - BIOL 104 General Biology II
4 - CH 106 Begin. Gen. and Organic Chem.1 or
4 - PHYS 200 Introductory Physics1
3 - CP SC 120 Intro. to Information Technology
3 - ENGL 103 Accelerated Composition
1 - F N R 102 FNR Freshman Portfolio

1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2Students not taking the CH 105/106 sequence must satisfy the General Education Science and Technology in Society Requirement by selecting a qualifying course from the Applied Science or Laboratory Science Requirement.
3See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement; and, if CH 105 is not selected, three credits must also satisfy the Science and Technology in Society Requirement. (Note: Social Science Requirement must be in an area other than economics.)
4Select from department-approved list.
5BIOSC 411, 443, 446, or FOR 315

Sophomore Year

First Semester
4 - CSENV 202 Soils
2 - FOR 205 dendrology
3 - FOR 221 Forest Biology
3 - W F B 300 Wildlife Biology
1 - W F B 301 Wildlife Biology Lab.
3 - Arts and Humanities (Literature) Requirement2

Second Semester
3 - BIOSC 303 Vertebrate Biology
3 - COMM 250 Public Speaking
3 - W F B 350 Principles of Fish and Wildlife Biol.
3 - Arts and Humanities (Non-Lit.) Requirement2
3 - Social Science Requirement2

Junior Year

First Semester
3 - AP EC 257 Nat. Res., Environment, and Econ.
4 - BIOSC 320 Field Botany
3 - ENGL 314 Technical Writing
3 - GEN 300 Fundamental Genetics
3 - W F B 462 Wetland Wildlife Biology

Second Semester
3 - E N R 302 Natural Resources Measurements
3 - EX ST 301 Introductory Statistics
3 - W F B (BIOSC) 313 Conservation Biology
3 - W F B 410 Wildlife Management Techniques
3 - Approved Requirement1

Senior Year

First Semester
4 - AVS 301 Anat. and Phys. of Domestic Animals
3 - W F B 412 Wildlife Management
3 - Approved Requirement1
3 - Ecology Requirement1
3 - Policy and Law Requirement1

Second Semester
1 - F N R 499 Natural Resources Seminar
3 - W F B 416 Fishery Biology
3 - W F B 440 Non-game Wildlife Management
1 - W F B 498 Senior Portfolio
6 - Approved Requirement1

122 Total Semester Hours
MINORS

Following are minors acceptable for students in the College of Agriculture, Forestry, and Life Sciences. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting
Adult/Extension Education
Aerospace Studies
Agricultural Business Management
Agricultural Mechanization and Business
American Sign Language Studies
Animal and Veterinary Sciences
Anthropology
Athletic Leadership
Biochemistry
Bioengineering
Biological Sciences
Business Administration
Chemistry
Cluster
Communication Studies
Communications
Community Recreation Management
Computer Science
Crop and Soil Environmental Science
East Asian Studies
Economics
Education
English
Entomology
Entrepreneurship
Environmental Engineering
Environmental Science and Policy
Equine Business—not open to Animal and Veterinary Sciences majors
Film Studies
Financial Management
Fine Arts
Food Science
Forest Products
Forest Resource Management
Genetics
Geography
Geology
Global Politics
Great Works
Health Science

History
Horticulture—not open to Turfgrass majors
Human Resource Management
Legal Studies
Management
Mathematical Sciences
Microbiology
Military Leadership
Modern Languages
Music
Natural Resource Economics
Nonprofit Leadership
Operations Management
Packaging Science
Pan African Studies
Park and Protected Area Management
Philosophy
Physics
Plant Pathology
Political Science
Poultry Science—not open to Animal and Veterinary Sciences majors
Psychology
Public Policy
Religion
Russian Area Studies
Science and Technology in Society
Screenwriting
Sociology
Spanish-American Area Studies
Sport Management
Textiles
Theatre
Therapeutic Recreation
Travel and Tourism
Turfgrass—not open to Horticulture majors
Urban Forestry
Wildlife and Fisheries Biology
Women’s Studies
Writing

See pages 36–39 for details.
