

COLLEGE OF ENGINEERING AND SCIENCE

The College of Engineering and Science offers a broad range of rigorous and stimulating baccalaureate programs which provide unexcelled educational opportunities. The innovative combination of engineering and science disciplines which comprises the College facilitates study and research in fields transcending the traditional disciplines. Students enjoy close interaction with a distinguished faculty committed to excellence in undergraduate education as well as in research. Additional information on the College and its programs is available at www.ces.clemson.edu.

Minors

Engineering and science students can complement their majors by selecting minor concentrations of study. Available minors include Bioengineering, Environmental Engineering, International Engineering and Science, one in each of the science majors, and in Textiles. (See page 97.)

International Programs

The world economy has become very tightly integrated, making it highly important that engineering and science students prepare themselves for this global environment. The College offers a minor in International Engineering and Science coupled with several programs that provide opportunities for students to gain international experience. These include study abroad at many locations around the world and EPIC (an international co-op program). In addition, engineering and science students are encouraged to pursue study of a foreign language. Information is available in the Undergraduate Studies Office (107 Riggs Hall) and at www.ces.clemson.edu/global.

ENGINEERING PROGRAMS

The professional Bachelor of Science engineering degrees in Bioengineering, Biosystems Engineering, Ceramic and Materials Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, and Mechanical Engineering are each accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. The Biosystems Engineering program is administered jointly with the College of Agriculture, Forestry, and Life Sciences.

All engineering programs have the common goal of producing engineering graduates who are able to

- apply knowledge of math, science, and engineering

- formulate and solve engineering problems
- design and conduct experiments and analyze data
- design systems or components to meet needs
- function on multidisciplinary teams
- communicate effectively

- conduct themselves professionally and ethically
- appreciate engineering's global/societal context
- understand contemporary engineering issues
- apply modern engineering methods and tools
- appreciate the need for life-long learning

Each engineering program has additional objectives specific to the discipline. All prepare students for a wide range of career opportunities and provide sound preparation for graduate study. Each curriculum provides opportunities for students to pursue individual areas of interest.

Admission Requirements

The University admission requirements are given under the section entitled *Admission*. Engineering applicants are strongly advised to include the following in their high school program:

Mathematics—Four units, including geometry, trigonometry, and introductory calculus

Laboratory Science—At least three units, including both chemistry and physics

Computing—At least one unit, including introduction to a programming language. Applicants should have good keyboarding skills.

General Engineering Program

All new engineering students (including transfer students who have not completed all courses in the freshman engineering curriculum) are admitted into General Engineering. The General Engineering Program provides students an opportunity to explore various engineering fields while getting a sound academic preparation for engineering study. To prepare students for entry into a specific engineering degree program, the second semester of the curriculum includes a Major Requirement of 6–7 credits. Additional information can be found at www.ces.clemson.edu/ge.

Freshman Curriculum

First Semester

- 2 - CES 102 Engineering Disciplines and Skills
- 4 - CH 101 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 4 - MTHSC 106 Calculus of One Variable I
- 3 - Arts and Humanities Requirement¹ *or*
3 - Social Science Requirement¹

16

Second Semester

- 4 - MTHSC 108 Calculus of One Variable II
- 3 - PHYS 122 Physics with Calculus I
- 3 - Arts and Humanities Requirement¹ *or*
3 - Social Science Requirement¹

6-7 - Major Requirement²
16-17

¹See Policy on Humanities and Social Sciences for Engineering Curricula below.

²See advisor.

Admission into Engineering Degree Programs

To transfer into an engineering degree program, a student must have completed each course in the freshman engineering curriculum (including the Major Requirement for the desired major) with a

grade of C or better with the exception of the Arts and Humanities/Social Science Requirements. The student must also have a minimum overall grade-point ratio of 2.0 or, in the case of enrollment-limited majors, must have the minimum grade-point ratio specified for that major.

Students should initiate a change-of-major request prior to the registration period during the semester when they expect to complete the freshman curriculum. Students who fail to meet the requirements for admission into a degree program may remain in General Engineering until those requirements are met; however, General Engineering majors are not permitted to take 300- or 400-level engineering courses. Engineering departments may allow General Engineering majors to enroll in selected 200-level engineering courses (policy varies by department). Students transferring into an engineering degree program will follow the curriculum in effect at the time of transfer.

Humanities and Social Sciences for Engineering Curricula

Engineers have an obligation to practice their profession in a socially responsible manner. The education of engineers must prepare them for this responsibility and make them aware of the constraints imposed by societal and cultural factors. Thus, the humanities and social sciences are an important component of the engineering curricula. Further, the program of study must include educational experiences addressing the intersection of science and technology with society and cross-cultural awareness.

Engineering curricula include a minimum of 15 credits of humanities/social science courses selected so as to satisfy the University's General Education Arts and Humanities and Social Science Requirements, as well as specific program objectives. Individual engineering curricula may have more specific requirements or may require more than 15 hours of humanities/social science courses. Students should consult their advisors for further information.

Electives for Engineering Curricula

Advisors must approve any course taken for elective credit in the Engineering curricula. Courses excluded for elective credit include PHYS 200, 207/209, 208/210.

Registration Requirements

A cumulative grade-point ratio of 2.0 or higher is required for registration in engineering courses numbered 300 or higher. Priority for registration in engineering courses is given to those majors for whom the course is a degree requirement. Exceptions to this requirement may be granted by the department offering the course.

Graduation Requirements

In addition to other institutional requirements, candidates for a baccalaureate degree in Engineering are required to have a 2.0 or higher cumulative grade-point ratio in all engineering courses taken at Clemson. All courses with "Engineering" in the course designator (e.g., ENGR 130, M E 453, etc.) are used in this calculation.

The baccalaureate programs in Engineering are designed to be completed in four years (eight regular semesters). Taking a reduced load or participating in cooperative education will extend this time. On average, Clemson engineering students take about four and one-half years to complete the requirements for graduation.

BIOENGINEERING

Bachelor of Science

The undergraduate program in Bioengineering is built upon a rigorous engineering science foundation that is, in turn, based upon a broad curriculum of applied and life sciences, mathematics, electives in humanities, social science, and design. Students select a formal focus that concentrates in a subfield of interest in bioengineering: Biomaterials Concentration or Bioelectrical Concentration.

The curriculum provides undergraduates with a solid background in engineering and life sciences in preparation for advanced studies. Through the Bioengineering program, graduates acquire an understanding of biology, biochemistry, and physiology and the capability to apply advanced mathematics including differential equations and statistics, science, and engineering to solve the problems at the interface of engineering and biology. Graduates also have an ability to make measurements on and interpret data from living systems, addressing the problems associated with the interaction between living and nonliving materials and system.

BIOMATERIALS CONCENTRATION

Freshman Year

First Semester

- 2 - CES 102 Engineering Disciplines and Skills
- 4 - CH 101 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 4 - MTHSC 106 Calculus of One Variable I
- 3 - Arts and Humanities Requirement¹ or

128 Total Semester Hours

¹See Policy on Social Sciences and Humanities for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

²Students planning to enter medical school should take CH 223/227 instead of CH 201 and take CH 224/228 as an additional course sequence.

³Select from department-approved list.

Notes:

1. To transfer from General Engineering into the Bioengineering degree program, students must have a minimum cumulative grade-point ratio of 3.0 in courses taken at Clemson and must have earned a C or better in each course in the General Engineering freshman curriculum including the Arts and Humanities/Social Science Requirements.
2. A student is allowed to enroll in E C E courses (excluding E C E 307, 308, 309) only when all prerequisites have been passed with a grade of C or better.
3. All Bioelectrical Concentration students must have a cumulative engineering grade-point ratio of 2.0 to enroll in any 300- or 400-level E C E courses.
4. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any E C E course.

BIOSYSTEMS ENGINEERING

Bachelor of Science

The principal objective of the Biosystems Engineering program is to educate and prepare students for a wide range of engineering endeavors involving biological entities. Two main areas are supported: engineering for management of natural resources and the environment and engineering for production of value-added products from bioprocessing technologies.

Biosystems engineers work at the interface between engineering and life sciences and must be knowledgeable in both disciplines. In addition to the common objectives of all engineering programs listed on page 80, Biosystems Engineering students should achieve familiarity with both biosystems concentrations, experience an interdisciplinary education, and develop a career goal of professional recognition and licensure.

Students develop specialization in one of two concentrations. The Applied Biotechnology Concentration equips students to apply engineering and biological sciences to problem solving for biological systems and production of value added bioproducts in a wide range of industries. The Natural Resources and Environment Concentration equips students to apply engineering, agricultural, and environmental sciences to assess and control the impact of human activities on the biosphere.

Students are urged to complete a minor and participate in the Cooperative Education, Biosystems En-

gineering Intern, and/or Study Abroad Programs. Those interested in medical careers should consider graduate study and/or medical school.

Additional information is available from the departmental offices or at www.clemson.edu/agbio-eng/bio/home.htm.

CERAMIC AND MATERIALS ENGINEERING**Bachelor of Science**

The School of Materials Science and Engineering offers undergraduate degrees in Ceramic and Materials Engineering, Polymer and Textile Chemistry, and Textile Management.

Ceramic and materials engineers design, develop, and participate in the manufacture of both standard and new materials intended for use in a wide variety of industries with diverse applications. These range from the semi-conductor to the aerospace and finally to the traditional ceramics industry. The broad scope of industrial responsibilities handled by ceramic and materials engineers requires knowledge in mathematics, science, engineering, and the social sciences, skills in problem solving, engineering analysis, design, and written and oral communication.

The baccalaureate program integrates laboratory with classroom experiences to prepare students for life-long learning. Courses covering thermodynamics, kinetics, mechanical behavior, processing, and characterization of materials prepare students for careers in industry and/or for graduate school.

In addition to the common educational objectives of all engineering programs listed on page 80, baccalaureate degree graduates in Ceramic and Materials Engineering will be able to

- demonstrate learning consistent with Accreditation Board for Engineering and Technology Engineering Criteria 2000 for ceramic and materials engineering programs
- function easily and well in the laboratory and plant environments and
- serve the local, national, and international ceramic and materials communities

Specifically, the Accreditation Board for Engineering and Technology Engineering Criteria 2000 requires that baccalaureate degree graduates in Ceramic and Materials Engineering be able to

- apply advanced scientific and engineering principles to ceramic and materials engineering systems
- demonstrate an integrated understanding of the scientific and engineering principles underlying structure, properties, processing, and performance relationships
- apply this understanding to the solution of ceramic and materials engineering selection and design problems and
- apply appropriate experimental, statistical, and computational methods to advantage in the solution of ceramic and materials problems

CHEMICAL ENGINEERING

Bachelor of Science

The Department of Chemical and Biomolecular Engineering offers the Bachelor of Science degree in Chemical Engineering. Chemical engineering is based on chemistry, physics, mathematics, and biology. The curriculum at Clemson includes a blend of classroom and laboratory instruction and emphasizes broadly applicable fundamental principles and current technology to prepare graduates for immediate, productive employment as well as life-long learning and professional growth. Communication skills and group projects are emphasized because chemical engineers frequently work in multidisciplinary teams. Graduates are prepared to engage successfully in chemical engineering practice or postgraduate education including medical and law school; apply their knowledge and use modern chemical engineering tools to design chemical processes and identify, formulate, and solve chemical engineering problems; educate themselves as knowledge and tools advance; and function effectively on teams, communicate effectively, and serve society through their professional contributions. Chemical engineers are involved in the research, manufacture, sales, and use of commodity and specialty chemicals, petroleum products, synthetic fibers and textiles, pharmaceuticals, pulp and paper, electronic components, food and consumer goods, and many other products. They work at the forefront of environmental pollution prevention and remediation and apply engineering science and technology to solve a variety of medical and health-related problems.

In addition to the Bachelor of Science degree, the Department of Chemical and Biomolecular Engineering offers advanced study leading to the Master of Science and Doctor of Philosophy degrees. Additional information can be found at www.ces.clemson.edu/chemeng.

13

127 Total Semester Hours

¹See Policy on Social Sciences and Humanities for Engineering Curricula. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

²See advisor for details. Nine credit hours devoted to completing an emphasis area or approved minor are required.

Note: No student may exceed a maximum of two attempts, including a W, to complete successfully any CH E course.

CIVIL ENGINEERING

Bachelor of Science

Civil Engineering involves the planning, design, construction management, operation, and maintenance of facilities and systems in the built environment including bridges, buildings, airports, water supply systems, ports, dams, and highways.

The Civil Engineering program leads to the Bachelor of Science degree in Civil Engineering and includes the common educational goals listed on page 80 for the College of Engineering and Science. (The complete objectives of the program can be found at www.ce.clemson.edu.) The first two years provide students with building blocks necessary to be successful civil engineers. This includes proficiency in calculus, engineering mechanics, physics, and chemistry. During the junior year, students receive a broad introduction to the fundamental areas of civil engineering (structures, hydraulics, geotechnical, transportation, environmental, construction materials, and project management). Design experiences are integrated throughout the curriculum, culminating in the senior year with a major capstone design project. In addition, during the senior year, students can select from available emphasis areas which serve to strengthen their undergraduate background.

The Civil Engineering program prepares students to work immediately upon graduation in most areas of civil engineering or to pursue graduate degrees. Students are also exposed to issues related to professional practice, including professional registration, life-long learning, and communication and team skills. Because a concerned society demands a realistic consideration of the impacts of engineering projects, civil engineering students are also educated in the broad areas of the humanities and social sciences.

The Department of Civil Engineering allows students to count up to six hours of graduate credit (600- and 800-level courses) toward both the bachelor's and master's degrees. Students participating in this program must have completed the junior year, must have earned a minimum 3.4 grade-point ratio, and must be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the department.

Freshman Year

First Semester

- 2 - CES 102 Engineering Disciplines and Skills
- 4 - CH 101 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 4 - MTHSC 106 Calculus of One Variable I
- 3 - Arts and Humanities Requirement¹ or
3 - Social Science Requirement¹

16

Second Semester

- 2 - ENGR 130 Engineering Fundamentals
 - 3 - GEOL 101 Physical Geology²
 - 1 - GEOL 103 Physical Geology Lab.²
 - 4 - MTHSC 108 Calculus of One Variable II
 - 3 - PHYS 122 Physics with Calculus I
 - 1 - PHYS 124 Physics Lab. I
 - 3 - Arts and Humanities Requirement¹ or
 - 3 - Social Science Requirement¹
- 17

Sophomore Year**First Semester**

- 2 - E G 209 Intro. to Engr./Computer Graphics
 - 3 - E M 201 Engineering Mechanics: Statics
 - 4 - MTHSC 206 Calculus of Several Variables
 - 3 - PHYS 221 Physics with Calculus II
 - 1 - PHYS 223 Physics Lab. II
 - 3 - Arts and Humanities Requirement¹ or
 - 3 - Social Science Requirement¹
- 16

Second Semester

- 4 - C E 206 Structural Mechanics
 - 2 - C E 208 Civil Engineering Dynamics
 - 3 - C E 255 Geomatics
 - 2 - C E 352 Economic Evaluation of Projects
 - 4 - MTHSC 208 Intro. to Ordinary Diff. Equations
- 15

Junior Year**First Semester**

- 3 - C E 301 Structural Analysis
 - 3 - C E 331 Construction Engineering and Mgt.
 - 4 - C E 341 Introduction to Fluid Mechanics
 - 4 - C E 351 Civil Engineering Materials
 - 3 - EX ST 301 Introductory Statistics
- 17

Second Semester

- 3 - C E 311 Transportation Engineering Planning and Design
 - 4 - C E 321 Geotechnical Engineering
 - 3 - C E 342 Applied Hydraulics and Hydrology
 - 1 - C E 353 Professional Seminar
 - 3 - EE&S 401 Environmental Engineering
 - 3 - Technical Design Requirement³
- 17

Senior Year**First Semester**

- 3 - ENGL 314 Technical Writing
 - 9 - Technical Requirement³
 - 3 - Technical Requirement Restricted³
- 15

Second Semester

- 3 - C E 459 Capstone Design Project
 - 3 - Arts and Humanities Requirement¹ or
 - 3 - Social Science Requirement¹
 - 3 - Arts and Humanities (Literature) Requirement¹
 - 3 - Technical Requirement³
 - 3 - Elective
- 15

128 Total Semester Hours

¹See Policy on Social Sciences and Humanities for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

²CH 102; or BIOL 120 and 121, 122, 123, or 124 may be substituted.

³See advisor. Technical Requirements and electives may be used to complete an emphasis area in one of the following fields: Applied Fluid Mechanics, Construction, Environmental Engineering, Geotechnical/Geoenvironmental Engineering, Transportation Engineering or Structural Engineering.

Note: Civil Engineering students may neither enroll in nor receive credit for any C E courses unless they have a 2.0 engineering grade-point ratio and a grade of C or better in course prerequisites that have a C E or E M designation. Exceptions: 1) Students may always re-enroll in C E courses which they have previously completed with a grade of C or lower. 2) Students need not have a C or better in 300-level C E courses to enroll in C E 459 (see course prerequisites).

COMPUTER ENGINEERING**Bachelor of Science**

Computer engineers have excellent career opportunities in the design and application of hardware and software components for a variety of computer applications. These include mainframe, desktop, and embedded microprocessor platforms as well as the networking of various types of computers and peripherals.

Based on a strong foundation in mathematics, computer science, and the physical sciences, the Computer Engineering program includes engineering science and design in circuits, electronics, computer organizations and design, peripheral interfacing, and software engineering. Emphasis is placed on hands-on experience with networked computer systems, micro-, mini-, and mainframe computers, and the solution of a wide range of practical problems, using engineering principles. In addition to these technical skills, students learn to communicate effectively and to develop interpersonal, teamwork, and management skills, all of which contribute to success in a professional engineering career. The program is also an excellent preparation for graduate study.

Information on the program and its objectives is available at www.ece.clemson.edu/ece/index.shtml.

Freshman Year**First Semester**

- 2 - CES 102 Engineering Disciplines and Skills
 - 4 - CH 101 General Chemistry

 - 6 - Computer Engineering Depth Technical Requirement²
- 15

127 Total Semester Hours

¹See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

²Select from department-approved list.

³See General Education Requirements.

Notes:

1. A student is allowed to enroll in E C E courses (excluding E C E 307, 308, 309) only when all prerequisites have been passed with a grade of C or better.

2. All Computer Engineering students must have a cumulative engineering grade-point ratio of 2.0 to enroll in any 300- or 400-level E C E courses.

3. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any E C E course.

ELECTRICAL ENGINEERING

Bachelor of Science

Electrical engineers are in high demand for a wide range of influential positions. Professional duties range from analytical problem solving to the design of components and systems. The scope of employment requires a unique breadth and depth of knowledge and technical skills, which are reflected in the Electrical Engineering program. This program also offers an excellent preparation for graduate education. Detailed information can be found at www.ece.clemson.edu/ece/index.shtml.

Building on a foundation of mathematical and physical sciences, students progress into the application of these in the engineering science areas of circuits, electronics, communications, controls, power, and electromagnetics. In these subjects, students also begin to apply the concepts and techniques learned to the design of circuits and systems. Senior technical design courses offer the opportunity to further develop expertise in a selected area.

In addition to these technical skills, students learn to communicate effectively, both orally and with the written word. Because engineers work for the benefit of society, the curriculum includes a strong component of humanities and social science courses. Also, many project design assignments enable the development of interpersonal, teamwork, and management skills which are necessary for success in a professional engineering career.

Freshman Year

First Semester

- 2 - CES 102 Engineering Disciplines and Skills
- 4 - CH 101 General Chemistry
- 4 - ENGL 103 Accelerated Composition
- 4 - MTHSC 106 Calculus of One Variable I
- 3 - Arts and Humanities Requirement¹ or

126 Total Semester Hours

¹See Policy on Humanities and Social Sciences for Engineering Curricula. Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

²Select from department-approved list.

³Students may enroll in E C E 222 for a common semester with Computer Engineering. Those not selecting this option should complete the Technical Requirement (E C E) in the senior year.

⁴See General Education Requirements.

Notes:

1. A student is allowed to enroll in E C E courses (excluding E C E 307, 308, 309) only when all prerequisites have been passed with a grade of C or better.

2. All Electrical Engineering students must have a cumulative engineering grade-point ratio of 2.0 to enroll in any 300- or 400-level E C E courses.

3. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any E C E course.

INDUSTRIAL ENGINEERING

Bachelor of Science

Industrial engineers design, install, and improve the complex systems that provide goods and services vital to our society and economy. These systems place unique demands for breadth of preparation on industrial engineers. Baccalaureate degree graduates demonstrate the ability to design, develop, implement, and improve integrated systems that include people, materials, information, equipment, and energy. Graduates will demonstrate the ability to apply the principles and techniques of industrial engineering analysis and design supported by a foundation in mathematical, physical and social sciences, and economic, operational, and engineering analyses. Graduates will possess a breadth of knowledge that allows them to practice industrial engineering with an appropriate awareness of information issues in systems improvement. In addition, graduates are able to work and communicate effectively with colleagues at every level in the organization.

The traditional arenas for the practice of industrial engineering are the manufacturing facilities of industry; however, many practicing industrial engineers are employed in non-manufacturing institutions such as hospitals, banks, and government agencies. In addition to numerous employment opportunities in professional practice, industrial engineering graduates may further their formal education. The Department of Industrial Engineering offers programs leading to the Master of Science and Doctor of Philosophy degrees.

The Department of Industrial Engineering allows students to count up to 12 hours of graduate credit (approved 600- and 800-level courses) toward both the bachelor's and master's degrees. Students participating in this program must have a minimum grade-point ratio of 3.4 and be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the Industrial Engineering Department.

Detailed curriculum and department information is available at www.ces.clemson.edu/ie.

128 Total Semester Hours

¹See policy on Social Sciences and Humanities for Engineering curricula.²Students may take PHYS 223 in the sophomore year in lieu of PHYS 124.³E G 208 may be substituted.⁴E M 202, M E 302, 308, or 310⁵Select from I E 452, 456, 460, 485, 487, 489. With preapproval, certain I E graduate courses may be used.**MECHANICAL ENGINEERING****Bachelor of Science**

Breadth, individuality, and flexibility are inherent characteristics of the mechanical engineering profession. Mechanical engineers, in a broad sense, make major contributions to the creation of products and systems that benefit mankind. They work in a variety of areas including bioengineering, energy systems, environmental and life-support systems, propulsion and transportation systems, food production, materials processing, automated manufacturing, and construction. A wide spectrum of career opportunities is open to them. The practice of mechanical engineering includes one or more of the following activities: manufacturing, testing, research, development, design, technical management, technical sales and marketing, construction, and teaching.

Preparation for a 40–45 year professional career requires development of the whole person through a balanced program encompassing the humanities, social sciences, communication and computer skills, physical and engineering sciences, design, and laboratory experience. Students start with the physical sciences and communication skills and progress through the engineering sciences, ultimately applying the principles learned in such areas as energy conversion and transfer, mechanical design, and systems analysis. Throughout the curriculum, the fundamental nature of engineering as a problem-solving discipline is emphasized.

Most graduates take positions in industry, government, or business. Many, however, continue their formal education in a graduate program. The Department of Mechanical Engineering offers study leading to the Master of Engineering, Master of Science, and Doctor of Philosophy degrees.

Mechanical Engineering students who have a cumulative grade-point ratio or cumulative engineering grade-point ratio (EGPR) below 2.0 are on probation and will have restricted enrollment in classes. Students whose cumulative grade-point ratio is below 2.0 are subject to the regulations stipulated under *Continuing Enrollment Policy*. Students on probation for EGPR below 2.0 who fail to recover in the first regular semester (fall or spring) will not be allowed to register for mechanical engineering classes. After one year, such students may petition the Mechanical Engineering Department for continued enrollment. An advising policy for students on probation is available from the Mechanical Engineering Department.

Additional information can be found at www.ces.clemson.edu/me.

Note: A student is allowed to enroll in any M E course only when all prerequisites, as defined by current official listings for that course, have been passed with a grade of C or higher.

SCIENCE PROGRAMS

The College offers curricula leading to the Bachelor of Science in Chemistry, Computer Information Systems, Computer Science, Geology, Mathematical Sciences, Physics, Polymer and Textile Chemistry, and Textile Management. The Bachelor of Arts is offered in Chemistry, Computer Science, Geology, Mathematical Sciences, and Physics.

The science departments in the College work closely with the other academic departments in the University, including such disciplines as economics and management as well as engineering. This allows students in the sciences great flexibility and responsibility in designing their own programs.

Bachelor of Science Curricula

The Bachelor of Science degree prepares graduates for professional employment or graduate study in the chosen science discipline. BS curricula are more highly structured than BA curricula but nonetheless offer opportunity for students to pursue a minor or secondary area of interest.

Bachelor of Arts Curricula

The curricula leading to the Bachelor of Arts degree are designed to meet the needs of students who desire a broad general education. They require a minor (or a second major) as well as the major concentration. A major requires a minimum of 24 credits from courses above the sophomore level including or in addition to courses specified by the major department. In some major disciplines, certain prescribed courses at the sophomore level are counted toward the 24 credit requirement.

Students have a large degree of flexibility and responsibility in selecting a minor area from those listed on page 97. Courses for these minors are to be selected in consultation with the appropriate department.

CHEMISTRY

Bachelor of Science

Chemistry, an experimental discipline based on observation guided by molecular theory, is of fundamental importance in much of modern science and technology. Its molecular concepts form the basis for ideas about complex material behavior. Due to the fundamental nature and extensive application of chemistry, an unusually large variety of challenging opportunities to contribute in the science-oriented community are open to students whose education is built around the principles of this discipline.

The curriculum, through the career requirement options and the large number of electives, provides students the opportunity to select a coherent program of study beyond the basic courses. Career requirement options are provided for students antic-

ipating graduate study in chemistry or related fields; employment following the BS degree in laboratory, production, technical sales, or management positions; professional studies (e.g., medicine); chemical physics; geochemistry; and employment in fields requiring extensive preparation in courses other than sciences (e.g., patent law and technical writing). Significant features of the curriculum are the student's extensive participation in experimental work and the opportunity to take part in a research investigation during the junior and senior years.

 - 6 - Minor Requirement
- 13

122 Total Semester Hours

¹See General Education Requirements. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

²Four semesters (through 202) of the same modern foreign language are required.

³See advisor.

COMPUTER INFORMATION SYSTEMS

Bachelor of Science

The Computer Information Systems degree program is oriented toward computer applications in management-related problems. The program emphasizes functional areas of management including accounting, production, marketing, and finance and the applications of computers in these areas. The curriculum is designed to prepare students for careers in areas such as systems design and analysis, applications programming, database administration, and information retrieval as well as for continued study toward an advanced degree.

Students who change majors into Computer Information Systems must have a cumulative grade-point ratio of 2.0 or higher.

Additional information can be found at www.cs.clemson.edu.

Freshman Year

First Semester

- 4 - CP SC 101 Computer Science I
 - 3 - ENGL 103 Accelerated Composition
 - 4 - MTHSC 106 Calculus of One Variable I
 - 3 - Social Science Requirement^{1,2}
- 14

Second Semester

- 4 - CP SC 102 Computer Science II
 - 4 - MTHSC 108 Calculus of One Variable II
 - 3 - MTHSC 119 Introduction to Discrete Methods
 - 3 - Arts and Humanities (Non-Lit.) Requirement^{1,2}
 - 3 - Social Science Requirement^{1,2}

122 Total Semester Hours

¹See General Education Requirements.

²Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

³Select from courses in A A H, A A S, ANTH, ART, CHIN, COMM, DANCE, E A S, ECON, ENGL, FR, GEOG, GER, HIST, HUM, ITAL, JAPN, MUSIC, P A, PHIL, PO SC, PSYCH, REL, RUSS, SOC, SPAN, THEA, W S.

⁴Select from one of the following sequences: BIOL 103,104; 110, 111; CH 101,102; 105,106; PHYS 122/124, 221/223; 207/209, 208/210.

⁵CP SC H395 may be substituted.

⁶FIN 306, MGT 390, or 400

⁷Select from CP SC courses numbered 300 or higher.

⁸MGT 452, 454, 455, 456, or 400-level CP SC course

Notes:

1. For graduation, a candidate for the BS degree in Computer Information Systems must have earned a grade of C or better in each CP SC course applied to the degree.

2. A grade of C or better must be earned in all prerequisite courses (including CP SC and MTHSC courses) before enrolling in the next CP SC course.

COMPUTER SCIENCE

Bachelor of Science

The Computer Science program is oriented toward design, implementation, and application of software systems to solve information processing problems. Emphasis areas outside computer science allow students to tailor the program to their individual needs and interests. This program is more technically oriented than the Computer Information Systems curriculum. It prepares students for employment in the computer software field or for continued study toward an advanced degree in computer science. This program is accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). Additional information can be found at www.cs.clemson.edu.

Students who change majors into Computer Science must have a cumulative grade-point ratio of 2.0 or better.

Combined Bachelor's/Master's Plan

The Department of Computer Science allows students to count up to nine hours of graduate credit (600- and 800-level courses) toward both the bachelor's and master's degrees. Students participating in this program must have a minimum grade-point ratio of 3.4 and be admitted to the Graduate School prior to registering for graduate courses. Details of the suggested curriculum and program information are available from the Department.

122 Total Semester Hours

¹See General Education Requirements. Three credit hours satisfying the Arts and Humanities Requirement must also satisfy the Cross-Cultural Awareness Requirement. Three hours satisfying the Arts and Humanities or Social Science Requirement must also satisfy the Science and Technology Society Requirement.

²Select from courses in A A H, A A S, ANTH, ART, CHIN, COMM, DANCE, E A S, ECON, ENGL, FR, GEOG, GER, HIST, HUM, ITAL, JAPN, MUSIC, P A, PHIL, PO SC, PSYCH, REL, RUSS, SOC, SPAN, THEA, W S.

³Two-semester sequence in the same physical or biological science, each including a laboratory is required. Select from BIOL 103, 104; 110, 111; CH 101, 102; GEOL 101/103 and 102; 112, 114. Alternately, if PHYS 124 and 223 are completed, six hours may be selected from courses in BIOL, BIOCH, BIOSC, CH, GEOL, MICRO, PHYS, or EN SP 200.

⁴Select nine hours from any single University approved minor. At least three hours must be at the 300-level or above.

⁵Select from 400-level CP SC courses. At least three hours must be selected from CP SC 405, 411, 429, 462, 472.

⁶CP SC H395 may be substituted.

Notes:

1. For graduation, a candidate for the BS degree in Computer Science must have earned a grade of C or better in each CP SC course applied to the degree.

2. A grade of C or better must be earned in all prerequisite courses (including CP SC and MTHSC courses) before enrolling in the next CP SC course.

COMPUTER SCIENCE**Bachelor of Arts**

The Bachelor of Arts in Computer Science is ideal for students interested in acquiring a broad-based liberal arts education that includes a strong and solid understanding of computer science. The curriculum is oriented toward design, implementation, and application of computer software systems to solve information processing problems. The program prepares students for employment in the computer software field or for continued study toward an advanced degree in computer science. Additional information can be found at www.cs.clemson.edu.

Students who change majors into Computer Science must have a cumulative grade-point ratio of 2.0 or higher.

Freshman Year**First Semester**

- 4 - CP SC 101 Computer Science I
 - 3 - ENGL 103 Accelerated Composition
 - 4 - MTHSC 106 Calculus of One Variable I
 - 4 - Foreign Language Requirement¹
-

Second Semester

122 Total Semester Hours

¹Four semesters (through 202) in the same modern foreign language are required.

²See General Education Requirements.

³Eight credit hours, including labs, in the same science selected from BIOL 103, 104; 110, 111; CH 101, 102; 105, 106; GEOL 101, 103; 102 or 112, 114; PHYS 122/124, 221/223; 207/209, 208/210

⁴Select from CP SC courses numbered 300 or higher.

⁵MTHSC 301, 302, or 311

⁶Six of these credit hours must also satisfy General Education Cross-Cultural Awareness and Science and Technology in Society Requirements.

⁷Select from courses in A A H, ANTH, ART, CHIN, DANCE, ENGL, FR, GER, HUM, ITAL, JAPN, MUSIC, P A, PHIL, REL, RUSS, SPAN, THEA.

⁸CP SC H395 may be substituted.

⁹MUSIC 210 or any course in A A H, ART, or THEA

Notes:

1. For graduation, a candidate for the BA degree in Computer Science must have earned a grade of C or better in each CP SC course applied to the degree.

2. A grade of C or better must be earned in all prerequisite courses (including CP SC and MTHSC courses) before enrolling in the next CP SC course.

GEOLOGY**Bachelor of Science**

Geology involves the physics and chemistry of materials which comprise the earth, but equally important, it considers the development of life on earth. Fundamentally, the chemical, physical, and biological responses to environments on and in the earth must be thoroughly understood so that the historical development of the earth can be deduced, predictions of the future inferred, and natural resources intelligently developed. Industry depends on minerals and rocks; metals have their origin in them as do our chief power sources: coal, petroleum, and radioactive minerals.

Employment opportunities for geologists include such far-reaching fields as mineral-producing industries, railroads, municipalities, engineering firms, and water authorities. It is important, therefore, that a geology education rest on a broad yet rigorous base.

Students pursuing a Bachelor of Science degree in Geology have three concentrations from which to choose. The "traditional" curriculum provides the fundamentals of geology and excellent support in the other basic sciences. Graduates are prepared for employment or for graduate study in any field of geology. The Environmental Science Concentration prepares students for careers in the environmental consulting industry or graduate school in environmental fields. Students in this concentration take 15 credits of Environmental Science Requirement, including at least nine credits from one of three subdisciplines: geology/soil science, biology/ecology, or chemistry/physics. The Hydrogeology Concentration may be taken by students interested in applying engineering principles to geologic problems. Engineering geologists are increasingly called upon to perform geologic site evaluations for construction projects and to minimize the threat of geologic hazards. The curriculum involves courses in engineering and soil mechanics plus 15 credits of Engineering Geology Requirement selected from courses in civil, environmental, and biosystems engineering or advanced mathematics.

Freshman Year

First Semester

4 - CH 101 General Chemistry
3 - ENGL 103 Accelerated Composition
3 - GEOL 101 Physical Geology
1 - GEOL 103 Physical Geology Lab.

¹MTHSC 106 and 108 are recommended.; however, MTHSC 101 and 102 or MTHSC 102 and 203 may be substituted.

²See General Education Requirements.

³Spanish is recommended. Two years (through 202) in the same foreign language are required.

⁴See advisor.

⁵Any 300- or 400-level geology course

⁶Select from department-approved list.

MATHEMATICAL SCIENCES**Bachelor of Science**

The Mathematical Sciences curriculum is designed to be versatile. Students gain a broad knowledge of mathematical concepts and methods that are applicable in sciences, engineering, business, industry, and other professions desiring a strong mathematical background. In addition to the basic courses which provide necessary mathematical skills, the curriculum allows students to select an emphasis area or concentration, providing an introduction to a specific area where mathematics is applied. These are Applied and Computational Mathematics, Biology, Computer Science, Operations Research/Management Science, and Statistics.

In addition to the overall goal of preparing students to cope with a variety of mathematical problems, the curriculum seeks to provide an adequate background for students who plan to pursue graduate study or positions in business, industry, or government. Students electing the Biology Concentration will have the necessary preparation for entering medical school. More information about the degree program can be found at www.math.clemson.edu.

All mathematical sciences majors are required to complete a capstone experience which provides an opportunity to pursue research, independent study, or an approved internship under the direction of a faculty member or the opportunity to study mathematical models in some area of the mathematical sciences. The capstone experience requires a written report (thesis, computer code, project description, intern experience, etc.) and an oral or poster presentation by each student.

Combined Bachelor's/Master's Plan

Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Mathematical Sciences (www.math.clemson.edu) as early as possible in their undergraduate program. Enrollment guidelines and procedures can be found under *Academic Regulations* in this catalog.

Freshman Year**First Semester**

2. A grade of C or better must be earned in all prerequisite courses before enrolling in the next MTHSC course.

PHYSICS

Bachelor of Science

Physics, the most fundamental of the natural sciences, forms the basis of study upon which the other branches of science are founded. Physics is concerned with the fundamental behavior of matter and energy. Classical physics encompasses the fields of mechanics, heat and thermodynamics, electricity and magnetism, acoustics and optics. Modern physics is concerned with the study of atoms and molecules, atomic nuclei, elementary particles and the properties of liquids, crystalline solids, and other materials, as well as the areas of relativity, cosmology, and the large-scale structure of the universe.

The undergraduate Physics curricula provide students with a strong background in the classical areas of physics as well as an introduction into the more important aspects of modern physics. The BS curriculum is directed toward preparing students for graduate study ultimately leading to the PhD degree or toward research and development work in industrial or governmental laboratories. It also provides a good background for graduate study or industrial work in many areas or engineering physics and applied science.

Freshman Year

First Semester

- 3 - ASTR 105 Physics of the Universe

²Two semesters (through 102) in the same modern foreign language are required.

³See General Education Requirements. This course must also satisfy the Science and Technology in Society Requirement.

⁴Select from department-approved list of courses in astronomy, chemistry, computer science, engineering, environmental engineering, geology, mathematical sciences, and physics. Twelve credit hours in one of these areas, with at least six at the 300–400 level, are required. *Note:* Requirements for a minor in one of these areas might be satisfied with three additional credits at the 300–400 level.

⁵Any 200–400-level science course

⁶Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.

BIOPHYSICS CONCENTRATION

The Biophysics Concentration offers an excellent preparation for medical school or graduate work in biological sciences. It includes the flexibility of selecting courses in chemistry, biological sciences, physics, and mathematics. This concentration also provides the necessary background for employment in industry, manufacturing, and instrumentation for clinical or molecular biology applications.

⁶Select any ENGL course from General Education Arts and Humanities (Literature) Requirement.

POLYMER AND TEXTILE CHEMISTRY AND TEXTILE MANAGEMENT

The School of Materials Science and Engineering offers undergraduate degrees in Ceramic and Materials Engineering, Polymer and Textile Chemistry, and Textile Management.

The Bachelor of Science degree in Polymer and Textile Chemistry is based on a foundation of core physical and mathematical science courses. From this base, students are taught, using classroom instruction, laboratory courses, and individual research, to apply their scientific knowledge to

the solution of problems in polymeric and fiber-based materials for diverse applications ranging from biomedical and sports to construction and communication. There are two emphasis areas in Polymer and Textile Chemistry; both allow students to prepare for graduate work in a number of science and engineering disciplines.

Textiles students study the production, structure, and properties of natural and man-made fibers; the processes for converting these fibers into textile structures; the science of coloring agents and finishes to improve the desirability and serviceability of the product; and the methods for evaluating the performance of textile materials.

Graduates in Polymer and Textile Chemistry and Textile Management hold jobs in corporate and personnel management, manufacturing management, design, research, development, technical service, quality control, and sales. They create new products and processes and solve problems. They create styles, patterns, textures, and colors for apparel, home, industry, and special applications. Their jobs utilize computers, automation, and product quality and are concerned with plant design, environmental control, and consumer safety.

MINORS

Following are minors acceptable for students in the College of Engineering and Science. Students cannot major and minor in the same field or acquire a minor that is not allowed by the degree program.

Accounting	History
Adult/Extension Education	Horticulture
Aerospace Studies	Human Resource Management
Agricultural Business Management	International Engineering and Science
Agricultural Mechanization and Business	Legal Studies
American Sign Language Studies	Management
Animal and Veterinary Sciences	Mathematical Sciences
Anthropology	Microbiology
Athletic Leadership	Military Leadership
Biochemistry	Modern Languages
Bioengineering	Music
Biological Sciences	Natural Resource Economics
Business Administration	Nonprofit Leadership
Chemistry	Operations Management
Cluster	Packaging Science
Communication Studies	Pan African Studies
Communications	Park and Protected Area Management
Community Recreation Management	Philosophy
Computer Science— <i>not open to Computer Information Systems majors</i>	Physics
Crop and Soil Environmental Science	Plant Pathology
East Asian Studies	Political Science
Economics	Poultry Science
Education	Psychology
English	Public Policy
Entomology	Religion
Entrepreneurship	Russian Area Studies
Environmental Engineering	Science and Technology in Society
Environmental Science and Policy	Screenwriting
Equine Business	Sociology
Film Studies	Spanish-American Area Studies
Financial Management	Sport Management
Fine Arts	Textiles— <i>not open to Polymer and Textile Chemistry or Textile Management majors</i>
Food Science	Theatre
Forest Products	Therapeutic Recreation
Forest Resource Management	Travel and Tourism
Genetics	Turfgrass
Geography	Urban Forestry
Geology	Wildlife and Fisheries Biology
Global Politics	Women's Studies
Great Works	Writing
Health Science	

See pages 36–39 for details.
