The mission of the College of Agriculture, Forestry and Life Sciences is to provide teaching, research, and service in agriculture, forestry, and life sciences that will benefit the citizens of South Carolina and the nation. The College of Agriculture, Forestry and Life Sciences serves more than 2,900 graduate and undergraduate students.

The ability to understand and manipulate the molecular structure of biological systems while at the same time understanding their practical management offers immense potential to improve our world, whether it is to improve foods, building products, the environment, or our health. The College of Agriculture, Forestry and Life Sciences is using the same expertise to produce more food on a shrinking globe; package environmentally sound products; grow better foods to fight breast cancer, prevent heart disease, and increase dairy production; increase timber production and provide new fuels; and develop businesses and promote a “green” society.

To assist students in achieving these goals, the William B. Bookhart Jr., Student Services Center provides academic advising and developmental services to promote success for students in the related degree programs. These services involve recruitment and retention, academic advising, multicultural affairs, study abroad, career development, and placement.

The College of Agriculture, Forestry and Life Sciences is impacting the world one graduate at a time—from classroom research to food production to packaged materials to the globe—developing partnerships for the future to make the world greener, healthier, tastier, and wealthier.

**AGRICULTURAL EDUCATION**

**Bachelor of Science**

Agricultural Education provides broad preparation in agricultural sciences and professional education, including communications and human relations skills. In addition to required courses, students may select a minor. (See page 60.)

The Bachelor’s degree prepares students for professional education positions in the mainstream of agriculture including teaching, cooperative extension service, and government agricultural agencies. The Agricultural Education degree also prepares students for other educational work such as agricultural missionary, public relations, and training officers in agricultural industry.

In consultation with the departmental advisor, students choose one of the following emphasis areas: Communications, Leadership or Teaching.

**Freshman Year**

First Semester
1. AG ED 102 Agric. Education Freshman Seminar
2. AG ED 200 Agricultural Applications of Educational Technology
3. Arts and Humanities (Non-Lit.) Requirement
4. AVS 150 Introduction to Animal Science
5. AG 151 Introduction to Animal Science Lab.
6. BIOL 103 General Biology I
7. BIOL 105 General Biology Lab. I
8. Mathematics Requirement
9. 15

Second Semester
1. AG ED 100 Orientation and Field Experience
2. AG ED 103 Multiculturalism in Agric. Ed.
3. AP EC 202 Agricultural Economics
4. BIOL 104 General Biology II
5. BIOL 106 General Biology Lab. II
6. ENGL 103 Accelerated Composition
7. Social Science Requirement
8. 17

**Sophomore Year**

First Semester
1. AG ED 201 Intro. to Agricultural Education
2. AG ED 203 Teaching Agriscience
3. AG ED 204 Applied Agriculture Calculations
4. CH 101 General Chemistry
5. CH 105 Chemistry in Context I
6. HORT 212 Introduction to Turfgrass Culture
7. HORT 213 Turfgrass Culture Lab.
8. 17

Second Semester
1. AG ED 355 Team and Organizational Leadership in Food and Fiber Systems
2. AG M 205 Principles of Fabrication
3. BIOL 201 Biotechnology and Society
4. BIOSC 200 Biology in the News
5. CH 102 General Chemistry
6. CH 106 Chemistry in Context II
7. COMM 101 Communication Academic and Professional Development
8. Arts and Humanities (Literature) Requirement
9. 16-17

**Junior Year**

First Semester
2. AG M 221 Surveying
3. COMM 201 Intro. to Communication Studies
4. CSENV 202 Soils
5. FOR 305 Woodland Management or
6. W F B 412 Wildlife Management
7. Arts and Humanities (Non-Lit.) Requirement
8. 19

Second Semester
1. ED F 302 Educational Psychology
2. HORT 305 Plant Propagation
4. Departmental Communication Requirement
5. Oral Communication Requirement
6. Elective
7. 16

**Senior Year**

First Semester
1. ENGL 231 Introduction to Journalism
2. HORT 303 Landscape Plants
3. Departmental Communication Requirement
4. Technical Requirement
5. 15

Second Semester
1. AG ED 407 Internship in Extension and Leadership Education
2. 12

128 Total Semester Hours

1See General Education Requirements.
2See advisor.
3See General Education Requirements. COMM 150 or 250 is recommended.
4Internship must meet departmental requirements for Communications Emphasis Area. See advisor.

**LEADERSHIP EMPHASIS AREA**

**Junior Year**

First Semester
2. AG M 221 Surveying
3. CSENV 202 Soils
4. FOR 305 Woodland Management or
5. W F B 412 Wildlife Management
6. HORT 303 Landscape Plants
7. Arts and Humanities (Non-Lit.) Requirement
8. 18

Second Semester
1. ED F 302 Educational Psychology
2. HORT 305 Plant Propagation
4. Oral Communication Requirement
5. Technical Requirement
6. Elective
7. 16
## Senior Year

**First Semester**
- AG ED 403 Principles of Adult/Ext. Educ. or AG ED 440 Prog. Devel. in Adult/Ext. Ed.
- AG ED 415 Leadership of Volunteers
- AG ED 416 Ethics and Issues in Agriculture and the Food and Fiber System
- MGT 201 Principles of Management
- Technical Requirement

**Second Semester**
- AG ED 407 Internship in Extension and Leadership Education
- Leadership Education
- Total Semester Hours: 126

### AGRICULTURAL MECHANIZATION AND BUSINESS

#### Bachelor of Science

The Agricultural Mechanization and Business major provides a program for students who desire training in areas relevant to dynamic agricultural enterprises. The program is organized with strength in both business management and technical support of agriculture and agribusiness. To produce well rounded individuals with good communication skills, the curriculum includes courses in the humanities, social sciences, English composition, and public speaking.

Graduates in Agricultural Mechanization and Business find meaningful and remunerative employment in a variety of situations directly and indirectly related to agricultural production, processing, marketing, and the many services connected therewith. Farming and technical sales in the agricultural, industrial, and heavy equipment industries are frequently chosen careers.

By completing this curriculum, graduates will have fulfilled the requirements for an Agricultural Business Management minor or other selected minor. Contact the Enrolled Student Services Office to have the minor recorded.

Additional information is available from the departmental offices or can be found at [www.clemson.edu/agbioeng/agmech/index.htm](http://www.clemson.edu/agbioeng/agmech/index.htm).

### Freshman Year

**First Semester**
- AG ED 200 Agricultural Applications of Educational Technology
- AG M 221 Surveying
- CSENV 202 Soils
- FOR 305 Woodland Management or W F B 412 Wildlife Management
- HORT 303 Landscape Plants

**Second Semester**
- ED F 302 Educational Psychology
- HORT 305 Plant Propagation
- HORT 306 Plant Propagation Techniques Lab.
- Oral Communication Requirement
- Technical Requirement
- Elective

**Senior Year**

**First Semester**
- AG ED 400 Supervised Field Experience II
- AG ED 401 Instructional Methods in Ag. Ed.
- AG ED 403 Principles of Adult/Ext. Educ. or AG ED 440 Prog. Devel. in Adult/Ext. Ed.
- AG ED 423 Curriculum
- Technical Requirement

**Second Semester**
- AG ED 406 Directed Teaching
- AG ED 425 Teaching Agricultural Mechanics

**Junior Year**

**First Semester**
- AG M 211 Surveying
- AG M 301 Soil and Water Conservation
- AG M 460 Electrical Systems
- Arts and Humanities (Literature) Requirement
- Agribusiness Requirement
- Minor Requirement

**Second Semester**
- AG M 406 Mechanical and Hydraulic Systems
- COMM 250 Public Speaking
- Agribusiness Requirement
- Minor Requirement
- Elective

**Sophomore Year**

**First Semester**
- AG M 206 Machinery Management
- AG M 303 Calculations for Mechanized Agric.
- CH 106 Chemistry in Context II
- CSENV 202 Soils
- E G 209 Intro. to Engr./Comp. Graphics

**Second Semester**
- AG M 421 Surveying
- AG M 457 Mobile Power
- AG M 472 Capstone
- Agribusiness Requirement
- Plant/Crop Science Requirement
- Social Science Requirement

**Junior Year**

**First Semester**
- AG M 402 Drainage, Irrigation and Waste Management
- AG M 405 Agricultural Structures and Environmental Control
- Minor Requirement
- Plant/Crop Science Requirement
- Social Science Requirement

**Second Semester**
- AG M 410 Precision Agriculture Technology
- AG M 452 Mobile Power
- AG M 472 Capstone
- Agribusiness Requirement
- Plant/Crop Science Requirement
- Soil Science Requirement

**Senior Year**

**First Semester**
- Agribusiness Requirement
- Arts and Humanities (Non-Lit.) Requirement

---

1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2See Agricultural Business Management minor or select other approved minor. If requirements for an approved minor have already been satisfied, this course must be any 300-level (or higher) course from an approved program.
3See General Education Requirements. Six of these credits must also satisfy the Cross-Cultural Awareness Requirement.
4ED F 315 may be substituted. In this case, ED F 425 must be taken in the semester immediately prior to directed teaching.
5See General Education Requirements. COMM 150 or 250 is recommended.
6See advisor.
ANIMAL AND VETERINARY SCIENCES

Bachelor of Science
The Animal and Veterinary Sciences curriculum provides students with both a basic and applied understanding of the scientific principles needed for successful careers in the scientific, technical, and business phases of livestock and poultry production, processing, and marketing. Strengths of this program include extensive hands-on instruction at Clemson’s five animal farms, personalized advising, and the opportunity for value-added experiences, including involvement in research, teaching, extension, international travel, and internships. Students choose from three concentrations.

The Animal Agribusiness Concentration prepares students for careers in the many facets of the animal industries, including production, sales and marketing, business management, advertising, and extension. The Equine Business Concentration prepares students for professions such as trainers, managers, riding instructors, sales or media representatives, breed association representatives or for equine entrepreneurial careers such as owners of tack shops, boarding facilities, or riding schools. The Pre-veterinary and Science Concentration prepares students to meet the requirements for most veterinary schools, graduate schools, and medical and dental schools. Students with South Carolina residency may compete for contract seats at Mississippi State, Tuskegee, and University of Georgia Colleges of Veterinary Medicine. Experienced preprofessional advising is provided for all students pursuing advanced degrees.

ANIMAL AGRIBUSINESS CONCENTRATION

Freshman Year
First Semester
1. AVS 100 Orientation to Animal and Vet. Sci.
2. AVS 101 Introduction to Animal Science
3. BIOL 103 General Biology I
4. BIOL 105 General Biology Lab. I or
5. BIOL 110 Principles of Biology I
6. CH 101 General Chemistry
7. Arts and Humanities (Non-Lit.) Requirement
8. Elective
9. Total Semester Hours
16-17

EQUINE BUSINESS CONCENTRATION

Freshman Year
First Semester
1. AVS 100 Orientation to Animal and Vet. Sci.
2. AVS 101 Introduction to Animal Science
3. BIOL 103 General Biology I
4. BIOL 105 General Biology Lab. I or
5. BIOL 110 Principles of Biology I
6. CH 101 General Chemistry
7. Arts and Humanities (Non-Lit.) Requirement
8. Total Semester Hours
16-17

Sophomore Year
First Semester
1. AVS 201 Financial Accounting Concepts
2. AP EC 202 Agricultural Economics
3. AVS 312 Forages and Grazing Systems or
   CSENV 423 Field Crops—Forages
4. Arts and Humanities (Literature) Requirement
5. AVS Techniques Requirement
6. Elective
7. Total Semester Hours
14

Second Semester
1. AVS Techniques Requirement
2. AVS Techniques Requirement
3. Departmental Requirement
4. Elective
5. Total Semester Hours
16

Junior Year
First Semester
1. AVS 301 Anat. and Phys. of Domestic Animals
2. AVS 370 Principles of Animal Nutrition
3. AVS 470 Animal Genetics
4. AVS Experience-Based Activity
5. Departmental Requirement
6. Elective
7. Total Semester Hours
16

Second Semester
1. AVS 375 Applied Animal Nutrition
2. AVS 413 Animal Products
3. AVS 453 Animal Reproduction
4. AVS Experience-Based Activity
5. Departmental Requirement
6. Elective
7. Total Semester Hours
15

Senior Year
First Semester
1. AVS 310 Animal Health
2. AVS 415 Contemporary Issues in Animal Sci.
3. AVS Experience-Based Activity
4. AVS Techniques Requirement
5. Elective
6. Total Semester Hours
14

Second Semester
1. AVS 406 Seminars and Related Topics
2. AVS 410 Domestic Animal Behavior
3. AVS 417 Animal Agribusiness Development
4. AVS 450 Animal Production Systems
5. AVS Experience-Based Activity
6. Elective
7. Total Semester Hours
16

Junior Year
First Semester
1. AVS 205 Horsemanship I or
2. AVS 207 Horsemanship II
3. AVS 301 Anat. and Phys. of Domestic Animals
4. AVS 310 Animal Health
5. AVS 370 Principles of Animal Nutrition

121–125 Total Semester Hours

\(^3\)See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.  
\(^4\)AVS 200, 201, 203, 206, or 209  
\(^5\)AVS 302, 309, 311, and 323 satisfy Oral Communication requirement. Students applying to veterinary school early (junior year) must have received credit for the Oral Communication requirement.  
\(^6\)Select nine hours from any graded (not pass/fail) 300- or 400-level course and/or any of the following courses: ACCT 201, AP EC 202 or ECON 211, ECON 212, CSENV 202, MGT 201, BIOESC 222, 223, SPAN 101, 102  
\(^7\)May be taken either semester of the junior year.  
\(^8\)AVS 360, 441, 442, 443, or 491

### APPLIED ECONOMICS AND STATISTICS

#### Bachelor of Science

The Applied Economics and Statistics curriculum helps students build a strong understanding of economic principles as applied in agribusiness, community and economic development, and other fields. Courses in applied statistics and quantitative methods help build decision-making and problem-solving skills and acquaint the student with tools for data analysis.

In the Agribusiness Emphasis Area, core courses focus on agribusiness management, leadership, marketing and sales, finance, accounting, and other business skill development. Employment opportunities for Agribusiness graduates are many and diverse. Private sector opportunities include agribusiness management, banking, finance, sales, marketing, and public relations. Public sector opportunities include positions in organizations that promote food, agriculture, and natural resource interests; government agencies; and educational institutions.

In the Community and Economic Development Concentration, core courses focus on community development methods, regional economic development, leadership, experiential learning, communication skills, and behavioral science principles. Employment opportunities for Community and Economic Development graduates include positions in social science administration, management, and research. Other careers include community development and economic development specialist positions with local, county, and state governments. Additional opportunities exist in a variety of agencies, research and consulting firms, foundations and councils, financial institutions, public and private utilities, and organizations looking for entrepreneurial skills.

In both plans of study, there is an increasing emphasis on globalization and information technology. Students are encouraged to participate on a creative inquiry student research team and to take advantage of an internship and/or study abroad opportunity. Both the Agribusiness and Community and Economic Development study options provide an excellent background for professional or graduate study in several disciplines.

For students interested in economics and natural resources, the Department of Applied Economics and Statistics also administers the Natural Resource and Economic Policy Concentration within the Environmental and Natural Resources degree program. See page 49 for program details.

### AGRIBUSINESS EMPHASIS AREA

BIOCHEMISTRY
Bachelor of Science
Biochemistry is the study of the molecular basis of life. To comprehend current biochemical information and make future contributions to our molecular understanding of life processes, students must obtain a broad background in biology and a firm foundation in chemistry, mathematics, and physics. This is the basis of the biochemistry curriculum.

The program provides an excellent educational background for professional school (medicine, dentistry, or veterinary medicine) and graduate school in biochemistry, molecular biology, or another biological science discipline. Graduates will find employment opportunities in the research and service programs of universities, medical schools, hospitals, research institutes, and industrial and government laboratories.

Freshman Year
First Semester
1 - BIOCH 103 Careers in Biochem. and Genetics

BIological Sciences

Bachelor of Science

Biology encompasses the broad spectrum of the modern life sciences, including the study of all aspects of life from the structure and function of the whole organism down to the subcellular levels and up through the interactions of organisms to the integrated existence of life on the entire planet. Descriptive, structural, functional, and evolutionary questions are explored through the hierarchy of the organization of life. Applications of current advances to the health and well-being of man and society, to nature and the continuation of earth as a balanced ecosystem, and to an appreciation of the place of natural science in our cultural heritage receive emphasis.

Majors in Biological Sciences receive classroom, laboratory, and field training in biology with an emphasis on chemistry, mathematics, and physics as necessary tools. The Bachelor of Science in Biological Sciences curriculum prepares students for graduate study in any of the life science areas (such as agricultural sciences, biochemistry, botany, cell and molecular biology, conservation, ecology and environmental science, entomology, forestry, genetics, industrial and regulatory biology, microbiology, morphology, physiology, wildlife biology, and zoology) for the health professions (medicine, dentistry, etc.), veterinary medicine; and for science teaching.

Combined Bachelor of Science in Biological Sciences/Master of Science in Bioengineering

Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. See Academic Regulations in this catalog for enrollment guidelines and procedures. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Biological Sciences or Bioengineering as early as possible in their undergraduate program as a number of required courses have prerequisites not normally taken by Biological Sciences majors.

Freshman Year

First Semester
5 - BIOL 110 Principles of Biology 1
1 - BIOSC 101 Frontiers in Biology I
4 - CH 101 General Chemistry
3 - COMM 150 Intro. to Human Communication

Second Semester
5 - BIOL 111 Principles of Biology II
1 - BIOSC 102 Frontiers in Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition

Sophomore Year

First Semester
5 - CH 223 Organic Chemistry and
1 - CH 227 Organic Chemistry Lab. or
4 - CH 201 Survey of Organic Chemistry

Second Semester
5 - BIOL 111 Principles of Biology II
3 - Major Requirement
4 - Animal or Plant Diversity Requirement
4 - Biochemistry or Genetics Requirement

Junior Year

First Semester
3 - BIOSC 335 Evolutionary Biology
3 - BIOSC 461 Cell Biology
2 - BIOSC 462 Cell Biology Lab.
3 - ENGL 315 Scientific Writing and Comm.
3 - PHYS 207 General Physics I and
1 - PHYS 209 General Physics I Lab. or
1 - PHYS 122 Physics with Calculus I and
1 - PHYS 124 Physics Lab. I

Second Semester
3 - PHYS 208 General Physics II and
1 - PHYS 210 General Physics II Lab. or
3 - PHYS 221 Physics with Calculus II and
1 - PHYS 223 Physics Lab. II
3 - Arts and Humanities (Non-Lit.) Requirement
5 - Major Requirement
3 - Social Science Requirement

Senior Year

First Semester
2 - BIOSC 493 Senior Seminar
3 - Major Requirement

Second Semester
12 - Major Requirement
3 - Social Science Requirement

124 Total Semester Hours

Notes:
1. A student is allowed to enroll in science and mathematics courses only when all prerequisites have been passed with a grade of C or higher.
2. A minimum grade of C is required in all science and mathematics courses. No student may exceed a maximum of two attempts, excluding a W, to complete successfully any science or mathematics course.

Notes:
1. BIOL 110 and 111 are strongly recommended, however, BIOL 103/105 may substitute for BIOL 110, and BIOL 104/106 may substitute for BIOL 111. The remaining 1-2 credits required must be satisfied by completing 1-2 extra credits from departmental course offerings at the 300 level or above. See advisor.
2. At least one lecture and associated laboratory must be completed for both animal diversity (BIOSC 302/306 or BIOSC 303/307) and for plant diversity (BIOSC 304/308, BIOSC 305/309, BIOSC 320, or BIOSC 406/407).
3. See General Education Requirements. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.
4. At least one lecture and associated laboratory must be completed for both biochemistry (BIOSC 301/302 or 305/306) and for genetics (GEN 302/303 or 302/303). CH 128 may be substituted for BIOSC 302 or 306.
5. See advisor. Select one lecture/lab combination from each of the following fields:
PREPHARMACY EMPHASIS AREA

Freshman Year
First Semester
3 - BIOL 103 General Biology I
1 - BIOL 105 General Biology Lab. I

BIOLOGICAL SCIENCES
Bachelor of Arts
The Bachelor of Arts in Biological Sciences provides a strong foundation in biology and is ideal for students desiring a liberal education emphasizing an interdisciplinary approach to a thorough understanding of the life sciences.

Double Major in Biological Sciences/Secondary Education
The Bachelor of Arts Degree in Biological Sciences and Secondary Education—Bioscience prepares students for teaching biology on the secondary school level and for graduate studies in any of the life science areas. See page 108 for the curriculum.

Freshman Year
First Semester
5 - BIOL 110 Principles of Biology I
1 - BIOCH 101 Frontiers in Biology I
1 - CH 101 General Chemistry
4 - COMM 150 Intro. to Human Communication
3 - MTHSC 106 Calculus of One Variable I
17
Second Semester
5 - BIOL 111 Principles of Biology II
1 - BIOCH 102 Frontiers in Biology II
4 - CH 102 General Chemistry
3 - ENGL 115 Accelerated Composition

3 - Social Science Requirement
2 - Toxicology Requirement
16

124 Total Semester Hours

3 CH 223/227 and 224 are recommended.
4 At least one lecture and associated laboratory must be completed for both animal diversity (BIOCH 302/306 or BIOCH 303/307) and for plant diversity (BIOCH 304/308, BIOCH 305/309, BIOCH 320, or BIOCH 406/407).
5 At least one lecture and associated laboratory must be completed for both biochemistry (BIOCH 301/302 or 305/306) and for genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOCH 302 or 306.
6 See advisor.
7 See advisor. Select one lecture/lab combination from each of the following fields:
Physiology—BIOCH 403/402, 459/460, 475/476
The remaining courses may be selected from BIOCH 302, or BIOCH or MICRO courses at the 300 level or higher.
8 See General Education Requirements. Six of these credits must also satisfy the Cross-Cultural Awareness and the Science and Technology in Society Requirements.

TOXICOLOGY EMPHASIS AREA
See Bachelor of Science curriculum for freshman year requirements.

Sophomore Year
First Semester
3 - BIOCH 210 Introduction to Toxicology
3 - CH 223 Organic Chemistry
1 - CH 227 Organic Chemistry Lab. or
4 - CH 201 Survey of Organic Chemistry
4 - Animal or Plant Diversity Requirement
4 - Biochemistry or Genetics Requirement
15

Any 400-level ENTOX course
## Senior Year

### First Semester
- 2 - BIOSC 493 Senior Seminar
- 3 - PHYS 207 General Physics I
- 1 - PHYS 209 General Physics I Lab.
- 3 - Major Requirement
- 3 - Minor Requirement
- 3 - Social Science Requirement

**Total Semester Hours:** 125 Total Semester Hours

---

### Notes:

1. BIOL 110 and 111 are strongly recommended; however, BIOL 103/105 may substitute for BIOL 110, and BIOL 104/106 may substitute for BIOL 111. The remaining 1–2 credits required must be satisfied by completing 1–2 extra credits from departmental course offerings at the 300 level or above. See advisor.
2. EX ST 301, MTHSC 111 or 301
3. CH 223, 227, and 224 may be substituted for CH 201. Most professional health sciences schools require two semesters of organic chemistry with laboratory.
4. At least one lecture and associated laboratory must be completed for both animal diversity (BIOSC 302/306 or BIOSC 303/307) and for plant diversity (BIOSC 304/308, BIOSC 305/309, BIOSC 320, or BIOSC 406/407).
5. At least one lecture and associated laboratory must be completed for both biochemistry (BIOSH 301/302 or 305/306) and for genetics (GEN 300/301 or 302/303). CH 228 may be substituted for BIOSH 302 or 306.
6. Four semesters (through 202) in the same modern foreign language are required.
7. See page 60 for approved minors.
8. See advisor. Select one lecture course from each of the following fields:
   - Ecology—BIOSC 441, 443, 446, 470
   - Physiology—BIOSH 316, 401, 459, 475
   The remaining courses must be selected from MICRO 305 or any BIOSC courses at the 300 level or higher.
9. See General Education Requirements. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

## PREREHABILITATION SCIENCES EMPHASIS AREA

### Freshman Year

### First Semester
- 3 - BIOL 103 General Biology I
- 1 - BIOL 105 General Biology Lab. I
- 1 - BIOSC 101 Frontiers in Biology I
- 4 - CH 101 General Chemistry
- 3 - COMM 150 Intro. to Human Communication
- 4 - MTHSC 106 Calculus of One Variable I

**Total Semester Hours:** 16

### Second Semester
- 3 - BIOL 104 General Biology II
- 1 - BIOL 106 General Biology Lab. II
- 1 - BIOSC 102 Frontiers in Biology II
- 4 - CH 102 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 3 - EX ST 301 Introductory Statistics

**Total Semester Hours:** 15

---

## Sophomore Year

### First Semester

- 3 - Arts and Humanities (Literature) Requirement
- 3 - Major Requirement
- 3 - Minor Requirement
- 3 - Social Science Requirement

**Total Semester Hours:** 16

**Total Semester Hours:** 125 Total Semester Hours

---

### Notes:

1. Prehabilitation programs require BIOL 103/105 and 104/106 or equivalent; however, BIOL 110 and 111 may substitute. The additional 1–2 credit hours will be subtracted from Major Requirement credits.
2. At least one lecture and associated laboratory must be completed for both animal diversity (BIOSC 302/306 or BIOSC 303/307) and for plant diversity (BIOSC 304/308, BIOSC 305/309, BIOSC 320, or BIOSC 406/407).
3. At least one lecture and associated laboratory must be completed for both biochemistry (BIOSH 301/302 or 305/306) and for genetics (GEN 300/301 or 302/303).
4. Four semesters (through 202) in the same modern foreign language are required.
5. See page 60 for approved minors. Psychology is recommended.
6. The Medical University of South Carolina and other Rehabilitation Sciences programs require PSYCH 201, 340, and 383.
7. See General Education Requirements. Six of these credit hours must also satisfy the Cross-Cultural Awareness and Science and Technology in Society Requirements.

---

### BIOSYSTEMS ENGINEERING

#### Bachelor of Science

The Biosystems Engineering program is administered jointly with the College of Engineering and Science. See page 88 for the curriculum.

### ENVIRONMENTAL AND NATURAL RESOURCES

#### Bachelor of Science

The Environmental and Natural Resources curriculum produces professionals who have a broad-based knowledge in natural resources and an ability to interact with other resource professionals to provide thoughtful solutions to environmental and natural resource problems. The world is blessed with an abundance of natural resources, but the problems associated with their conservation are immense. Protection of rare and endangered species, preventing and controlling invasion of exotics, protecting old growth forests, restoring degraded ecosystems, and balancing the resource demands of industry and the public are some of the environmental issues which are enmeshed in politicized environments.

Three concentrations are offered within the Environmental and Natural Resources major. The Conservation Biology Concentration is oriented toward students who desire a greater exposure to taxa, their habitats, and their interrelationships. The Natural Resources Management Concentration emphasizes both resource management and negotiation skills. These two concentrations are administered by the Department of Forestry and Natural Resources. The Natural Resource and Economic Policy Concentration provides more in-depth study in economics and policy applications and is administered by the Department of Applied Economics and Statistics.

Graduates in Environmental and Natural Resources are well-prepared for further graduate studies in natural resources and related fields. Potential public sector employers of graduates include federal, state, and municipal resource management agencies, private industries impacting land and water resources, environmental management consulting firms, and various environmental advocacy groups.

#### Freshman Year

### First Semester
- 3 - BIOL 103 General Biology I
- 1 - BIOL 105 General Biology Lab. I
- 4 - CH 105 Chemistry in Context I
- 1 - E N R 101 Intro. to Env. and Natural Res. I
- 1 - HLTH 350

**Total Semester Hours:** 15

---

The Biosystems Engineering program is administered jointly with the College of Engineering and Science. See page 88 for the curriculum.
SECOND SEMESTER
3 - BIOL 104 General Biology II
1 - BIOL 106 General Biology Lab. II
4 - CH 106 Chemistry in Context II
3 - ENGL 103 Accelerated Composition
1 - F N R 102 FNR Freshman Portfolio
3 - Computer Science Requirement

15

Students planning to take Organic Chemistry should substitute CH 101 and 102 and must satisfy the General Education Science and Technology in Society Requirement through another course.

CONSERVATION BIOLOGY
CONCENTRATION
Sophomore Year

3 - Applied Economics Requirement
15

Second Semester
3 - AP EC 457 Natural Resource Use, Technology, and Policy
3 - ECON 319 Environmental Economics
3 - FOR (E N R) 434 GIS for Landscape Planning
3 - Ecology Requirement or
3 - Minor Requirement
3 - Macroeconomics Requirement
15

College of Agriculture, Forestry and Life Sciences
Second Semester
- C. D. R (AP EC) 357 Natural Res. Economics
- E. N. R 302 Natural Resources Measurements
- GEO 101 Physical Geology
- GEO 103 Physical Geology Lab.
- Minor Requirement

16

Senior Year
First Semester
- FOR (E N R) 416 Forest Policy and Admin.
- W F B 418 Fishery Conservation
- W F B 462 Wetland Wildlife Biology
- Conservation Colloquium or Internship
- Minor Requirement

16

Second Semester
- E. N. R 450 Conservation Issues
- ENGL 314 Technical Writing
- EX ST 301 Introductory Statistics
- 406 Forested Watershed Management
- 498 Senior Portfolio or
- W F B 498 Senior Portfolio
- Minor Requirement

15

122 Total Semester Hours

See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

A minor is required and must be selected from the following:
- Biochemistry
- Biological Sciences
- Chemistry
- Crop and Soil Environmental Science
- Environmental Science and Policy
- Forest Resource Management
- Geology
- Horticulture
- Legal Studies
- Microbiology
- Natural Resource Economics
- Nonprofit Leadership
- Park and Protected Area Management
- Therapeutic Recreation
- Travel and Tourism
- Urban Forestry
- Wildlife and Fisheries Biology.

See advisor.

FOOD SCIENCE

Bachelor of Science

Food Science majors apply principles of basic and applied sciences to the design, creation, manufacture, packaging, distribution, and utilization of safe, nutritious, and enjoyable foods and food products. The curriculum allows flexibility for concentrating in one of two areas.

In the Food Science and Technology Concentration, students may emphasize business, culinary science (one of three national programs that have been approved by the Research Chef's Association as Culinology), engineering, food packaging, and additional sciences that complement requirements of the Institute of Food Technologists.

The Nutrition and Dietetics Concentration emphasizes nutrition and related areas. It is currently initially accredited by the Commission on Accreditation for Dietetics Education of the American Dietetic Association.

Food processing industries, ingredient manufacturers, and packaging suppliers employ graduates in new food product development, quality assurance, production management, and technical sales. State and federal agencies also need graduates for food safety and regulatory positions. With the Nutrition and Dietetics Concentration, employment opportunities include dietitians, nutritionists, consultants, and food specialists. Placement rates are high for all of these fields, and graduates are also well prepared to pursue graduate study in many areas.

The Department of Food Science and Human Nutrition also offers an accelerated five-year combined bachelor’s/master’s program that allows students to count up to twelve hours of graduate credit toward both the BS degree in Food Science and the MS degree in Food, Nutrition and Culinary Sciences. Details are available from the Department of Food Science and Human Nutrition or at www.clemson.edu/foodscience.

FOOD SCIENCE
AND TECHNOLOGY
CONCENTRATION

Freshman Year
First Semester
- BIOL 103 General Biology I
- BIOL 105 General Biology Lab. I or
- BIOL 110 Principles of Biology I
- CH 101 General Chemistry
- COMM 150 Intro. to Human Communication
- FD SC 101 Epochs in Man’s Struggle for Food
- MTHSC 102 Intro. to Math. Analysis or
- MTHSC 106 Calculus of One Variable I

15-17

Second Semester
- BIOL 104 General Biology II
- BIOL 106 General Biology Lab. II or
- BIOL 111 Principles of Biology II
- CH 102 General Chemistry
- ENGL 103 Accelerated Composition
- FD SC 102 Perspectives in Food and Nutrition Sciences
- FD SC 450 Creative Inquiry
- PSYCH 201 Introduction to Psychology

16-17

Sophomore Year
First Semester
- CH 201 Survey of Organic Chemistry or
- CH 223 Organic Chemistry and
- CH 227 Organic Chemistry Lab.
- FD SC 450 Creative Inquiry
- PHYS 122 Physics with Calculus I
- PHYS 124 Physics Lab. I or
- PHYS 200 Introductory Physics or
- PHYS 207 General Physics I and
- PHYS 209 General Physics I Lab.
- Arts and Humanities (Non-Lit.) Requirement
- Social Science Requirement

15

Second Semester
- BIOCH 305 Essential Elements of Biochem.
- EX ST 301 Introductory Statistics
- FD SC 214 Food Resources and Society
- FD SC 450 Creative Inquiry
- Arts and Humanities (Non-Lit.) Requirement
- Elective

15

Junior Year
First Semester
- FD SC 301 Food Regulations and Policy
- FOR 417 Seminar
- FD SC 450 Creative Inquiry
- MICRO 407 Food and Dairy Microbiology
- Emphasis Area Requirement

13

Second Semester
- ENGL 304 Business Writing or
- ENGL 314 Technical Writing
- FD SC 410 Food Product Development
- FD SC 450 Creative Inquiry
- MICRO 407 Food and Dairy Microbiology
- Emphasis Area Requirement

15

Senior Year
First Semester
- FD SC 306 Food Service Operations or
- FD SC 307 Restaurant Food Service Mgt.
- FD SC 401 Food Chemistry I
- FD SC 404 Food Preservation and Processing
- FD SC 407 Quantity Food Production
- FD SC 450 Creative Inquiry
- Emphasis Area Requirement

16

Second Semester
- FD SC 402 Food Chemistry II
- FD SC 408 Food Process Engineering
- FD SC (PIK) 409 Total Quality Mgt. for the Food and Packaging Industries
- FD SC 450 Creative Inquiry
- Emphasis Area Requirement

15

122–125 Total Semester Hours

See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

For students undecided on concentration area, AP EC 202, ECON 211, or 212 is recommended.

FD SC 430 or AVS 413

See advisor.
NUTRITION AND DIETETICS CONCENTRATION

Freshman Year
First Semester
3 - BIOL 103 General Biology I and
1 - BIOL 105 General Biology Lab. I or
5 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
3 - COMM 150 Intro. to Human Communication
1 - FD SC 101 Epochs in Man's Struggle for Food
3 - MTHSC 102 Intro. to Math. Analysis or
4 - MTHSC 106 Calculus of One Variable I
15-17

Second Semester
3 - BIOL 104 General Biology II and
1 - BIOL 106 General Biology Lab. II or
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
1 - FD SC 102 Perspectives in Food and Nutrition Sciences
3 - PSYCH 201 Introduction to Psychology
15-16

Sophomore Year
First Semester
3 - AP EC 202 Agricultural Economics or
3 - ECON 211 Principles of Microeconomics or
3 - ECON 212 Principles of Macroeconomics
4 - CH 201 Survey of Organic Chemistry or
3 - CH 223 Organic Chemistry and
1 - CH 277 Organic Chemistry Lab.
1 - NUTR 216 Current Issues in Nutrition
3 - PHYS 122 Physics with Calculus I and
1 - PHYS 124 Physics Lab. I or
4 - PHYS 200 Introductory Physics or
3 - PHYS 207 General Physics I and
1 - PHYS 209 General Physics Lab.
3 - Arts and Humanities (Literature) Requirement
15

Second Semester
3 - BIOCH 305 Essential Elements of Biochem.
3 - EX ST 301 Introductory Statistics
3 - FD SC 214 Food Resources and Society
1 - FD SC 450 Creative Inquiry
3 - Arts and Humanities (Non-Lit.) Requirement
2 - Elective
15

Junior Year
First Semester
4 - BIOSC 222 Human Anatomy and Phys. I
1 - FD SC 301 Food Regulations and Policy
1 - FD SC 450 Creative Inquiry
4 - MICRO 305 General Microbiology
3 - NUTR 451 Human Nutrition
2 - Elective
15

Second Semester
4 - BIOSC 223 Human Anatomy and Phys. II
3 - ENGL 304 Business Writing or
3 - ENGL 314 Technical Writing
1 - FD SC 450 Creative Inquiry
4 - MICRO 407 Food and Dairy Microbiology
3 - NUTR 455 Nutrition and Metabolism
15

Senior Year
First Semester
3 - FD SC 306 Food Service Operations
4 - FD SC 401 Food Chemistry I
3 - FD SC 404 Food Preservation and Processing
2 - FD SC 407 Quantity Food Production
1 - NUTR 418 Professional Devel. in Dietetics or
1 - NUTR 419 Professional Devel. in Nutrition
4 - NUTR 424 Medical Nutrition Therapy I
17

Second Semester
4 - FD SC 402 Food Chemistry II
3 - FD SC (PKGSC) 409 Total Quality Mgt. for the Food and Packaging Industries
1 - FD SC 450 Creative Inquiry
4 - NUTR 425 Medical Nutrition Therapy II
3 - NUTR 426 Community Nutrition
15

122–125 Total Semester Hours

See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

NUTR 419 is recommended for students not pursuing registered dietitian (RD) status.

FOREST RESOURCE MANAGEMENT

Bachelor of Science
The Forest Resource Management curriculum combines a broad education in the arts and sciences with applied forest sciences. This combination provides the necessary foundation for the scientific management of forest resources, products, and services.

Foresters are qualified for a broad spectrum of employment opportunities in the public and private sectors. They may be engaged as managers, administrators, or owners of forest lands or forest-based businesses; as technical specialists in the production of timber, usable water, wildlife, and aesthetic values, and in the recreational use of the forest; or as professionals in other areas where the conservation of natural resources is a concern. Foresters earning advanced degrees find employment in academic work and in research conducted by public and private agencies.

The curriculum, accredited by the Society of American Foresters, provides a strong program in the basic knowledge and skills required of a professional forester. Forest Resource Management majors will select a minor. (See page 60.) The curriculum also provides the necessary prerequisites for graduate study.

For students interested in conservation biology, water, and natural resources, the Department of Forestry and Natural Resources also administers the Conservation Biology Concentration and the Natural Resources Management Concentration within the Environmental and Natural Resources degree program. See page 49 for program details.

Freshman Year
First Semester
3 - BIOL 103 General Biology I
1 - BIOL 105 General Biology Lab. I
4 - CH 105 Chemistry in Context I
1 - E N R 101 Intro. to Environ. and Natural Res. I
3 - MTHSC 102 Intro. to Mathematical Analysis
3 - Oral Communication Requirement
15

Second Semester
3 - BIOL 104 General Biology II
1 - BIOL 106 General Biology Lab. II
3 - ENGL 103 Accelerated Composition
3 - EX ST 301 Introductory Statistics
1 - F N R 102 FNR Freshman Portfolio
4 - Departmental Science Requirement
15

Sophomore Year
First Semester
4 - F N R 204 Soil Information Systems
2 - FOR 205 Dendrology
3 - FOR 221 Forest Biology
3 - Arts and Humanities (Literature) Requirement
3 - Economics Requirement
15

Second Semester
3 - ENGL 314 Technical Writing
3 - FOR 206 Forestry Ecology
3 - Arts and Humanities (Non-Lit.) Requirement
3 - Social Science Requirement
3 - Minor Requirement
15

Forestry Summer Camp
2 - FOR 251 Forest Communities
1 - FOR 252 Forest Operations
4 - FOR 253 Forest Mensuration
1 - FOR 254 Forest Products
8

Junior Year
First Semester
2 - FOR 102 Forest Biometrics
3 - FOR 104 Forest Resource Economics
3 - FOR 141 Wood Procurement Practices in the Forest Industry
4 - FOR 413 Integrated Forest Pest Management
3 - FOR (E N R) 434 GIS for Landscape Planning
1 - Internship, Creative Inquiry or Directed Research Requirement
16

Second Semester
2 - FOR 308 Remote Sensing in Forestry
3 - FOR 408 Wood and Paper Products
3 - FOR 418 Forest Resource Valuation
4 - FOR 465 Silviculture
3 - Minor Requirement
1 - Internship, Creative Inquiry or Directed Research Requirement
16
**Senior Year**

**First Semester**
1. FOR 410 Harvesting Processes
2. FOR (E N R) 416 Forest Policy and Admin.
3. FOR 417 Forest Resource Mgt. and Regulation
5. Minor Requirement
6. Internship, Creative Inquiry or Directed Research Requirement

**Second Semester**
1. F N R 499 Natural Resources Seminar
2. FOR 406 Forested Watershed Management
3. FOR 415 Forest Wildlife Management
4. FOR 425 Forest Resource Management Plans
5. FOR 498 Senior Portfolio
6. Minor Requirement

131 Total Semester Hours

---

**SECOND SEMESTER**

- For students selecting this option, students selecting this option must also satisfy the Cross-Cultural Awareness Requirement. (Note: Social Science Requirement must be in an area other than economics or applied economics.)

- See advisor.

- AP EC 257, ECON 200, 211, or 212

- To be selected by the middle of the sophomore year

- F N R 470, 490, or FOR 419

**LAND SURVEYING EMPHASIS AREA**

**Freshman Year**

**First Semester**
1. BIOL 103 General Biology I
2. BIOL 105 General Biology Lab. I
3. CH 105 Chemistry in Context I
4. E N R 101 Intro. to Environ. and Natural Res. I
5. MTHSC 102 Intro. to Mathematical Analysis
6. Oral Communication Requirement

**Second Semester**
1. BIOL 104 General Biology II
2. BIOL 106 General Biology Lab. II
3. ENGL 103 Accelerated Composition
4. EX ST 301 Introductory Statistics
5. F N R 102 FNR Freshman Portfolio
6. Departmental Science Requirement

**Sophomore Year**

**First Semester**
1. FOR 204 Site Information Systems
2. FOR 205 Dendrology
3. FOR 221 Forest Biology
4. Arts and Humanities (Literature) Requirement
5. Economics Requirement

**Second Semester**
1. BIOL 322 Small Watershed Hydrology and Sedimentology
2. F N R 499 Natural Resources Seminar
3. FOR 406 Forested Watershed Management
4. FOR 415 Forest Wildlife Management
5. FOR 425 Forest Resource Management Plans
6. FOR 498 Senior Portfolio
7. LAW 333 Real Estate Law
8. 129 Total Semester Hours

---

**Third Semester**

- See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement. (Note: Social Science Requirement must be in an area other than economics or applied economics.)

- See advisor.

- AP EC 257, ECON 200, 211, or 212

- Summer internship must be in land surveying.
## Junior Year

### First Semester
3. BIOSC 461 Cell Biology
2. BIOSC 462 Cell Biology Lab.  
3. GEN 410 Fundamentals of Genetics I  
1. GEN 411 Fundamentals of Genetics II Lab.  
3. Science Requirement
3. Elective

### Second Semester
3. GEN 420 Fundamentals of Genetics II  
1. GEN 421 Fundamentals of Genetics II Lab.  
3. GEN (BIOCH) 440 Bioinformatics  
3. PHIL 326 Science and Values  
3. Genetics Requirement  
3. Elective

### HORTICULTURE

#### Bachelor of Science

Horticulture connects plants and people to improve our world, be it through the enhancement of the foods we eat, the creation of healthy natural living spaces, the economic and aesthetic enhancement of our homes and communities, or the application of green solutions to the challenges of environmental quality. The plants of horticulture are the foundation of human and environmental well-being, and it is horticulture professionals who have the knowledge, skills, and passion to utilize those plants for the betterment of humankind.

The Horticulture degree program includes courses in science, mathematics, business, leadership, law, and communication, combined with a strong foundation in horticultural sciences and arts. The curriculum provides the flexibility to choose courses within those categories that best support the student’s personal interests, goals, and success. Career opportunities are endless.

Students work closely with faculty in creative inquiry groups to investigate and implement solutions to real problems. Internships are excellent opportunities to learn and explore potential careers.

#### Freshman Year

### First Semester
3. BIOL 103 General Biology I  
1. BIOL 105 General Biology Lab. I  
3. HORT 101 Horticulture  
3. MTHSC 102 Intro. to Mathematical Analysis  
1. Arts and Humanities (Non-Lit.) Requirement  
3. Social Science Requirement  
16

### Second Semester
3. ENGL 103 Accelerated Composition  
1. HORT 102 Experience Horticulture  
4. Laboratory Science Requirement  
3. Social Science Requirement  
14

### Sophomore Year

#### First Semester
3. CH 105 Chemistry in Context I  
1. CH 106 Chemistry in Context II  
3. HORT 303 Landscape Plants  
3. Business Requirement  
4. Plant Biology Requirement  
14

#### Second Semester
3. HORT 304 Annuals and Perennials  
3. HORT 305 Plant Propagation  
1. HORT 306 Plant Propagation Techniques Lab.  
3. Arts and Humanities (Literature) Requirement  
14

### Summer
3. HORT 271 Internship or  
3. HORT 471 Advanced Internship

---

### Microbiology

#### Bachelor of Science

Microbiology deals with the study of bacteria, viruses, yeasts, filamentous fungi, protozoa, and unicellular algae. Microbiologists seek to describe these organisms in terms of their structures, functions, and processes of reproduction, growth, and death at both the cellular and molecular levels. They are also concerned with their ecology, particularly in regard to their pathological effects on man, and with their economic importance.

The Microbiology major provides a thorough training in the basic microbiological skills. Further, students receive instruction in mathematics, physics, chemistry, and biochemistry, all essential to the training of a modern microbiologist. Students can prepare for a variety of careers through a wide choice of electives. The Microbiology curriculum with a Biomedicine Concentration is recommended for students planning postgraduate programs. Microbiology graduates may enter graduate school in microbiology, biochemistry, bioengineering, or related disciplines; they may
enter medical or dental schools or pursue careers in one of the many industries or public service departments dependent upon microbiology. Some of these are the fermentation and drug industries, medical and public health microbiology, various food industries, and agriculture.

Microbiology majors planning to apply for admission to a medical or dental school should inform their advisors immediately upon entering the program.

**Freshman Year**

**First Semester**
- 5 - BIOL 110 Principles of Biology I
- 4 - CH 101 General Chemistry
- 3 - COMM 150 Intro. to Human Communication
- 1 - MICRO 101 Microbes and Human Affairs
- 4 - MTHSC 106 Calculus of One Variable I

**Second Semester**
- 5 - BIOL 111 Principles of Biology II
- 4 - CH 102 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 3 - Mathematics Requirement

**Sophomore Year**

**First Semester**
- 3 - CH 223 Organic Chemistry
- 1 - CH 227 Organic Chemistry Lab.
- 4 - MICRO 305 General Microbiology
- 3 - Arts and Humanities (Literature) Requirement
- 3 - Elective

**Second Semester**
- 3 - BIOCH 301 Molar Biochemistry
- 1 - BIOCH 302 Molar Biochemistry Lab.
- 3 - CH 224 Organic Chemistry
- 3 - CH 228 Organic Chemistry Lab.
- 3 - Arts and Humanities (Non-Lit.) Requirement
- 3 - Microbiology Requirement
- 3 - Social Science Requirement

**Junior Year**

**First Semester**
- 3 - BIOL 110 Principles of Biology I

- 3 - Elective
# Packaging Science

## Bachelor of Science

The Bachelor of Science degree in Packaging Science prepares students for careers in industries producing and utilizing packages for all types of products. Packaging is an essential part of industrialized economies, protecting, preserving, and helping to market products. The field of packaging is highly competitive and highly innovative, requiring an ever-increasing number of professional positions. Opportunities for employment include a wide variety of career paths such as manufacturing, marketing, sales, design, purchasing, quality assurance, and customer services. Most career opportunities are in positions requiring technical knowledge combined with marketing and management skills.

The core curriculum assures graduates of having the skills and knowledge required by most entry-level packaging positions. Emphasis area choices or approved minors allow students to select courses to improve career preparation for specific industry segments, including distribution and transportation, engineering technology, food and health care packaging, package design and graphics, materials, international packaging, marketing/finance, business administration, entrepreneurship, environmental engineering, environmental science and policy, and management.

Students changing majors to Packaging Science must have at least a 2.0 cumulative grade point ratio.

### Freshman Year

**First Semester**
- 3 - BIOL 103 General Biology I
- 1 - BIOL 105 General Biology Lab. I
- 4 - CH 101 General Chemistry
- 4 - MTHSC 106 Calculus of One Variable I
- 1 - PKGSC 101 Packaging Orientation
- 3 - Social Science Requirement

**Second Semester**
- 3 - BIOL 104 General Biology II
- 1 - BIOL 106 General Biology Lab. II
- 4 - CH 102 General Chemistry
- 3 - ENGL 103 Accelerated Composition
- 2 - PKGSC 102 Intro. to Packaging Science
- 1 - PKGSC 103 Packaging Science E-Portfolio

### Sophomore Year

**First Semester**
- 4 - CH 201 Survey of Organic Chemistry
- 3 - CH 223 Organic Chemistry and
- 1 - CH 227 Organic Chemistry Lab.
- 3 - PHYS 207 General Physics I
- 1 - PHYS 209 General Physics I Lab.
- 3 - PHYS 122 Physics with Calculus I
- 1 - PHYS 124 Physics Lab. II
- 4 - PKGSC 202 Packaging Materials and Manuf.
- 2 - PKGSC 203 Packaging Research Fundamentals

**Second Semester**
- 4 - G C 103 Graphic Comm. I for Packaging Sci.
- 3 - PHYS 208 General Physics II and
- 1 - PHYS 210 General Physics II Lab. or
- 3 - PHYS 221 Physics with Calculus II and
- 1 - PHYS 223 Physics Lab. II
- 3 - PKGSC 201 Packaging Perishable Products
- 3 - PKGSC 204 Container Systems
- 1 - PKGSC 206 Container Systems Lab.
- 2 - PKGSC 220 Package Drawing/CAD

### Summer
- 0 - CO-OP 101 Cooperative Education

### Junior Year

**First Semester**
- 3 - PKGSC 320 Package Design Fundamentals
- 3 - PKGSC 368 Packaging and Society
- 3 - PKGSC 404 Mechanical Properties of Packages and Principles of Protective Packaging
- 3 - PKGSC 430 Converting for Flexible Packaging
- 1 - PKGSC 454 Product and Package Eval. Lab.
- 3 - Emphasis Area Requirement

**Second Semester**
- 3 - COMM 250 Public Speaking
- 3 - PKGSC 401 Packaging Machinery
- 3 - PKGSC 440 Packaging for Distribution
- 3 - Arts and Humanities (Literature) Requirement
- 3 - Emphasis Area Requirement

### Senior Year

**First Semester**
- 3 - EX ST 301 Introductory Statistics
- 4 - PKGSC 416 Appl. of Polymers in Packaging
- 4 - PKGSC 464 Food and Health Care Pkg. Syst.
- 3 - Emphasis Area Requirement

**Second Semester**
- 3 - AP EC 202 Agricultural Economics
- 3 - ECON 211 Principles of Microeconomics
- 1 - PKGSC 403 Packaging Career Preparation
- 3 - PKGSC 420 Package Design and Development
- 3 - Arts and Humanities (Non-Lit.) Requirement
- 6 - Emphasis Area Requirement

**122 Total Semester Hours**

- 1 A C or better is required in this course for graduation.
- 2 See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement. Note: Social Science Requirement must be in an area other than economics or applied economics. A 200 level or higher foreign language course is recommended to satisfy the Arts and Humanities (Non-Literature) Requirement.
- 3 Students interested in minors or emphasis areas should take any prerequisites in the sophomore year.
- 4 At least one 15-week period (six months preferred) of Cooperative Education is required.
- 5 PKGSC 404 and 454 must be taken concurrently.

*Completion of an approved minor or emphasis area is required. Approved minors are Business Administration, Entrepreneurship, Environmental Engineering, Environmental Science and Policy, and Management. Emphasis Areas consist of 15 credit hours selected from one of the following areas: Distribution and Transportation, Environmental Science, Food and Health Care Packaging, Package Design and Graphics, Materials, International Packaging, and Marketing/Finance. See advisor for approved emphasis area courses.

## Preprofessional Health Studies

### Non-degree

The health professions need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. The philosophies of education, the specific preprofessional course requirements, the noncognitive qualifications for enrollment, and the systems of training vary among the professional health schools; but all recognize the desirability of a broad education—a good foundation in the natural sciences, highly developed communication skills, and a solid background in the humanities and social sciences. The absolute requirements for admission to professional health schools are limited to allow latitude for developing individualized undergraduate programs of study; however, most schools of medicine and dentistry require 16 semester hours of chemistry, including organic chemistry, eight hours of biological sciences, eight hours of physics, and six hours of mathematics. These requirements should be balanced with courses in vocabulary building, the humanities, and social sciences. The basic requirements in the natural sciences and as many of the courses in the humanities and social sciences as possible should be completed by the third year so that students will be prepared to take the Dental Admission Test or the Medical College Admission Test prior to applying to a professional school.

Undergraduates may also prepare to study optometry, podiatry, and other health professions. While the basic requirements for these professional schools are essentially the same as those for schools of medicine and dentistry, specific requirements for individual schools in these professions vary somewhat; consequently, interested students are advised to consult with the chief health professionals advisor.

At Clemson, rather than having a separate, organized preprofessional health studies program, students are allowed to major in any curriculum, as long as the basic entrance requirements of the professional health school are fulfilled. These schools are not as concerned about a student’s major as they are about academic performance in whichever curriculum the student chooses. Professional health schools have neither preferences nor prejudices concerning any curriculum, which is evidenced by the fact that their entering students represent a broad spectrum of curricula. The emphasis is placed on the student’s doing well in the curriculum chosen, and this becomes critical as competition increases for the limited number of places available in professional health schools.
PREPHARMACY

The two-year Prepharmacy program requires 66–72 credit hours, depending on the pharmacy school of interest. Upon completion of the program, students will be eligible to apply to a college of pharmacy, usually the South Carolina College of Pharmacy (MUSC and USC campuses), and may be eligible to apply for the Bachelor of Science in Preprofessional Studies. The degree in Pharmacy is awarded by the institution attended. It is important for students to work closely with their advisor as there are variations in courses required by the pharmacy schools.

For financial aid purposes, students in the Prepharmacy program are considered to be enrolled in a degree-seeking program.

First Year

First Semester
3 - BIOL 103 General Biology I
1 - BIOL 105 General Biology Lab. I
4 - CH 101 General Chemistry
4 - MTHSC 106 Calculus of One Variable I
3 - PSYC 201 Introduction to Psychology
3 - Arts and Humanities (Non-Lit.) Requirement
18

Second Semester
3 - BIOL 104 General Biology II

3 - COMM 250 Public Speaking
3 - PHYS 208 General Physics II
1 - PHYS 210 General Physics II Lab.
3 - Science and Tech. in Society Requirement
18

Third Year

72–90 Total Semester Hours

1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.

PREREHABILITATION SCIENCES

The Prehabilitation Sciences major includes concentrations in physical therapy, occupational therapy, communication sciences and disorders programs at MUSC, requires a baccalaureate degree in any area, students are advised to select a major with similar requirements after consultation with the Prehabilitation Sciences advisor. The following curriculum fulfills the general requirements for those fields requiring less than a baccalaureate degree. Electives should be chosen after consultation with the advisor. Professional schools may change their requirements at any time, so it is imperative that students in this major stay in close contact with their advisor.

For financial aid purposes, students in the Prehabilitation Sciences program are considered to be enrolled in a degree-seeking program.

PREVETERINARY MEDICINE

Under a regional plan, the South Carolina Pre veterinary Advisory Committee coordinates a program for South Carolina residents who are interested in pursuing careers in veterinary medicine. South Carolina residents attending any college or university may apply through the Veterinary Medical College Application Service (VMCAS) to the University of Georgia College of Veterinary Medicine. Currently the University of Georgia admits up to 17 students each year through arrangements with the Southern Regional Education Board. The State of South Carolina has a contract with Mississippi State University to admit up to five South Carolina residents. The State of South Carolina also has a contract with Tuskegee University to admit up to four South Carolina residents. Application must be made directly to Tuskegee University.

Minimum requirements for admission to a college of veterinary medicine generally include the satisfactory completion of prescribed courses in a well-rounded undergraduate degree program. Specific requirements for admission to the University of Georgia College of Veterinary Medicine include the following undergraduate courses: six credits of English, 14 credits of humanities and social studies, eight credits of physics, eight credits of general biology, eight credits of advanced biology, three credits of biochemistry, and 16 credits of organic and inorganic chemistry. (Chemistry and physics courses must be at the premedical level; they may not be survey courses.)

To be in the best competitive position, applicants should complete courses in animal agriculture, genetics, nutrition, biochemistry, and advanced biology. Considerations for selection are character, scholastic achievement, personality, experience with large and small animals, general knowledge, and motivation. In the past, competition has been keen, and only those applicants who have shown exceptional ability have been admitted. Specific considerations may include a minimal grade-point average and completion of standardized tests such as the Graduate Record Examination and the Veterinary College Admission Test.
Since out-of-state students attending Clemson are ineligible to apply to the University of Georgia or Tuskegee University under the South Carolina quota, they should contact the college(s) of veterinary medicine to which they plan to apply. They may apply at the University of Georgia for at-large admission.

Veterinary schools accept students with a broad range of academic backgrounds; therefore, it is recommended that the beginning university student select any undergraduate major and simultaneously complete the courses required for veterinary school entrance and those required for completion of a BS or BA degree. For students selecting Animal and Veterinary Sciences or Biological Sciences at Clemson University, the basic curricula have been designed to accommodate Georgia’s entrance requirements. Further information is available from the Department of Animal and Veterinary Sciences at (864) 656-3427.

SOILS AND SUSTAINABLE CROP SYSTEMS

Bachelor of Science

The BS degree program in Soils and Sustainable Crop Systems is a multidisciplinary program that educates students with expertise in soils, crop sciences, and applied agricultural biotechnology. It offers students a rigorous, science-based degree with educational opportunities related to management of agricultural commodities and natural resources, as well as soil and water resources. Students can tailor the program to fit their professional and academic goals by selecting one of three concentrations with emphasis areas.

The Agricultural Biotechnology Concentration integrates conventional disciplines with molecular advances in plants, pathogens, and biosystem interactions and responds to the educational void between the rapid adoption of biotechnology products into agricultural production and the intermediate-and end-users, farmers, and consumers. Graduates in this concentration will be competitive as scientists in emerging agricultural biotechnology industries, as educators, and as policy makers and officers in regulatory agencies.

Students with a concentration in Soil and Water Environmental Science can address compelling problems such as land application of agricultural and industrial wastes, reduction of contamination of ground and surface waters, establishment of functional septic drain fields, and production of food and fiber crops. Graduates will be able to establish careers in traditional agrarian fields such as soil scientists and conservationists, extension agents, and farm consultants, and in the broader environmental arenas of DHEC, consulting engineering firms, and environmental consulting. Graduates will be well prepared for graduate work in fields ranging from soil science to environmental engineering and law.

Students with a concentration in Sustainable Crop Production will graduate with comprehensive knowledge to increase farm profits by decreasing the costs of crop and production; build soil fertility and nutrition cycling; protect the environment by minimizing or more efficiently using synthetic agrichemicals; manage pests and weeds with integrated, ecologically sound strategies; develop strategies for profitable marketing of agricultural commodities; and create a strong, diversified agriculture that is stable through market and weather fluctuations. Graduates can assume positions as self-employed farmers, farm managers, state and federal natural resource managers, research technicians, agricultural industry employees, greenhouse managers, consultants in pest management and sustainable agriculture, field ecology professionals, agri-tourism industry specialists, extension personnel, or regulatory officers.

Freshman Year

First Semester
5 - BIOL 110 Principles of Biology I
4 - CH 101 General Chemistry
3 - MTHSC 102 Intro. to Math. Analysis I or
4 - MTHSC 106 Calculus of One Variable I
1 - SSCS 101 Survey of Soils and Sustainable Crop Systems
3 - Arts and Humanities (Non-Lit.) Requirement
16-17

Second Semester
5 - BIOL 111 Principles of Biology II
4 - CH 102 General Chemistry
3 - ENGL 103 Accelerated Composition
3 - EX ST 301 Introductory Statistics or
4 - MTHSC 108 Calculus of One Variable II or
4 - MTHSC 207 Multivariable Calculus
1 - SSCS 102 Academic and Professional Dev. I
16-17

*BOL 110 and 111 are strongly recommended; however, BIOL 103/105 may substitute for BIOL 110, and BIOL 104/106 may substitute for BIOL 111.

**MTHSC 106 is recommended for students in the Agricultural Biotechnology Concentration.

AGRICULTURAL BIOTECHNOLOGY CONCENTRATION

Sophomore Year

TURFGRASS

Bachelor of Science

Turfgrass is a major part of our built environment and daily life, including home lawns, sports fields, and golf courses. Grassed areas are aesthetically attractive and provide many environmental benefits, including the prevention of soil erosion, noise reduction, improved water quality, and reduced injuries from sports.

Graduates pursue careers in management of professional golf courses and sports fields and in lawn care; production and sale of seed, sod, supplies, and equipment; or as technicians for businesses or government agencies. The curriculum provides a strong foundation in science, advanced business, and environmental and leadership skills that are needed for success in today's competitive environment. Courses in horticulture also provide a background for turfgrass managers who may have responsibilities for landscaped areas.

Students work closely with faculty in creative inquiry groups to investigate and implement solutions to real problems. Student interns experience a wide range of turf facilities, businesses, and public institutions to develop skills and experience needed for successful careers. In addition, the University's golf course (Walker Golf Course) and athletic fields offer great employment and learning opportunities.

Freshman Year
First Semester
3 - BIOL 103 General Biology I 1 - BIOL 105 General Biology Lab. I 3 - HORT 101 Horticulture 3 - MTHSC 102 Intro. to Mathematical Analysis 3 - Arts and Humanities (Non-Lit.) Requirement 3 - Social Science Requirement 16

122 Total Semester Hours

1See General Education Requirements. Three of these credit hours must also satisfy the Cross-Cultural Awareness Requirement.
2See advisor. Select from department-approved list.
3Internship must be completed in one or two semesters. Internship may be done fall, spring, or summer after completing HORT 212/213. Prior approval is required for internships, and a 2.0 grade-point ratio is required for registration.

Note: Turfgrass majors must make a C or better in all HORT-designated courses. Courses may be repeated as often as necessary to achieve the minimum grade.

**WILDLIFE AND FISHERIES BIOLOGY**

**Bachelor of Science**
Increased interest in conservation of natural resources and the environment and demand for seafood products has resulted in these areas becoming increasingly technical and requiring highly qualified wildlife and fisheries biologists. Greatest demands for graduates are in the areas of management, research, survey, and regulatory positions with state and federal agencies; industrial research and quality control laboratories; conservation, recreation, and other public service agencies; and private enterprises.

The Bachelor of Science degree program in Wildlife and Fisheries Biology provides a solid foundation for many careers in the sciences. The curriculum is strong in basic and applied sciences, communication skills, and the social sciences. In addition, three credit hours are available for field training with appropriate natural resource agencies. Students may satisfy coursework requirements for professional certification by the Wildlife Society and/or the American Fisheries Society.

For students interested in conservation biology, water, and natural resources, the Department of Forestry and Natural Resources also administers the Conservation Biology and Natural Resources Management Concentrations within the Environmental and Natural Resources degree program. See page 49 for program details.

**Combined Bachelor of Science/ Master of Science Degree Program**
Under this plan, students may reduce the time necessary to earn both degrees by applying graduate credits to both undergraduate and graduate program requirements. Students are encouraged to obtain the specific requirements for the dual degree from the Department of Forestry and Natural Resources as early as possible in their undergraduate program, as a number of required courses have prerequisites not normally taken by Wildlife and Fisheries Biology majors. Enrollment guidelines and procedures can be found under Academic Regulations in this catalog.

**Freshman Year**
